1. Introduction

Thank you for purchasing a GRUNDIG digital video recorder.

This manual is for GDV-B2208A, GDV-A4416A, GDV-C4416A and GDV-B8832A. Before product installation and operation, please become thoroughly familiar with this user manual and other manuals referenced by this manual.

This user manual, the software and the hardware described here are protected by copyright law. With the exception of copying for general use within fair use, copying and reprinting the user manual, either partially or in entirety, or translating it into another language without the consent of ASP AG is strictly prohibited. This specification may change without prior notice for improvement of product performance.

Product Warranty and Limits of Responsibility:

The manufacturer does not assume any responsibility concerning the sale of this product and does not delegate any right to any third party to take any responsibility on its behalf. No warranty is offered for any attachments or parts not supplied by the manufacturer. The product warranty does not cover cases of accidents, negligence, alteration, misuse or abuse, for example:

- Malfunctions due to negligence by the user
- Deliberate disassembly and replacement by the user
- Connection of a power source other than a properly rated power source
- Malfunctions caused by natural disasters (fire, flood, tidal wave, etc.)
- Replacement of expendable parts (HDD, FAN, etc.)
- The warranty period for the HDD and Fan is one year after purchase.

This product is not for exclusive use of crime prevention but also for assistance in cases of fire. We take no responsibility for damage from any incident.

Caution:

This equipment underwent EMC registration and is suitable for business purposes. Distributors and users are aware of this point.

Warning:

This is a class A product. In a domestic environment this product may cause radio interference, in which case the user may be required to take adequate measures.

Warning:

1. In case of changing the built-in lithium battery, it should be replaced with the same or a kindred one to prevent danger of explosion. Since old batteries could be a factor of environment contamination, be cautious how you treat them.
2. Do not throw the batteries into fire or other heat. Short circuit or disassembly is prohibited.
3. Do not charge the batteries provided with the remote control.

1.1. Available Versions

These instructions apply to the following products. For the different properties of the products please refer to the table.

Model	Channels	CIF speed	2CIF speed	4CIF speed	GDS	DVI	RAID
GDV-B2208A	8	200 fps	200 fps	100fps	-	1	-
GDV-A4416A	16	400 fps	200 fps	100fps	-	1	-
GDV-C4416A	16	400 fps	400 fps	400fps	1	2	✓
GDV-B8832A	32	800 fps	800 fps	400fps	1	2	✓

1.2. Key Features of your DVR

Monitoring Screens

The DVR supports real live video with high resolution for each channel and a variable display mode.

- Real H.264 Video
- Covert channels for users

- Variable display mode

- GDV-B2208A : 1/4/8 channel mode
- GDV-A4416A : 1/4/9/10/16 channel mode
- GDV-C4416A : 1/4/9/10/16 channel mode
- GDV-B8832A: 1/4/9/10/16 channel mode

- Multi monitor outputs

- GDV-B2208A : Composite x 2, DVI x 1
- GDV-A4416A : Composite x 2, DVI x 1
- GDV-C4416A : Composite x 4, DVI x 2
- GDV-B8832A : Composite x 4, DVI x 2

Audio Recording

The DVR supports real-time audio input and recording.

- Simultaneous 4ch audio input & recording available

For GDV-B8832A & GDV-C4416A: Input: 4Ch RCA, 12Ch D-Sub, Output: 1Ch (Rear)
For GDV-A4416A & GDV-B2208A: Input : 4Ch, Output: 1ch (Rear)

- Simultaneous audio recording and playback available

Recording

The DVR supports max. 800ips (GDV-B8832A), 400 ips (GDV-C4416A / GDV-A4416A) or 200ips (GDV-B2208A) recording at High-Resolution (H.264).

- Supports manual, continuous, schedule & event recording
- Video loss detection
- Supports archiving event lists (Sensor, Video Loss, Motion Detection, Text)
- Possible to record max. 5 seconds before an event is triggered per each channel

Backup devices

You can back up to DVD-R, CD-R & USB (Fat32 formatted).

- Supports various backup devices : DVD-R, CD-R, USB
- eSATA port for external recording HDDs

Search / Playback

These products support variable and convenient functions for search & playback.

- Search for Events (Motion, Video Loss, Text & Relays)
- Search for Dates (Calendar & Date input method)
- Smart Search for Motion Detection
- All Search methods can be used via DVR, remote control & USB mouse

Network

These products support networks like LAN, XDSL and can be easily controlled from remote site using the GRUNDIG Control Center Software.

- E-mail and/or Twitter notification
- Access Live video and playback with many Web browsers, backup with the Internet Explorer
- Access Live video, playback, search, backup and DVR management with the GRUNDIG Control Center Software
- Record, search & playback over a network
- 10/100Mbps Ethernet/xDSL connection

ETC

- User friendly GUI with mouse function
- Easy and simple firmware upgrade over USB or the network
- PTZ Control (several protocols), PRESET function
- Control of up to 16 DVRs with one remote controller
- 10/100/1000Mbps connection for the external storage device GDS-R04A
- Advanced user management with covert function

2. Important Safety Instructions

1. Do not place heavy objects on the top of the product.
2. This Product is for indoor use. It is not weatherproof. Please use the product considering its environmental specifications (Temperature & Humidity). To clean the product, gently wipe the outside with a clean dry cloth.
3. This Product uses AC power of 110V ~ 240V. Be cautious not to cause electric damages to the product.
4. Be careful not to drop the product. Physical shocks may harm the product including the internal HDD. In addition, be sure the product is secured after installation.
5. This Product is made of metal. Therefore you can hurt human beings if you throw it to them or hit it on them. When installing the product, be cautious to locate it in safe places where children cannot reach it.

6. If the product does not operate properly, please contact the closest GRUNDIG distributor for after sales service. Tampering or disassembling the product will cause expiration of the warranty.

7. Security surveillance laws may differ for each country. Therefore, please contact the local region first to avoid any surveillance law violations.

8. Experience and technical skills are needed for the installation of this product as an improper installation may cause fire, electric shocks, or defects. Any installation job should be performed by the vendor you purchased this product from.

The content of this manual can differ according to firmware or software upgrading. The standard and appearance of the products may be changed for the improvement of quality without an advance notice.

3. Package Contents

These parts are included:

AC Cord

Bracket

SATA HDD Cable
(built-in)

Screws for HDD

VGA Adapter

USB Mouse

Remote Control
(battery included)

Setup CD

Quick Guide

4. Installation

4.1. Part Names and Functions

Front view of GDV-B2208A:

Item	Description
1	DVD-Multi (for Backup) Backup of recorded data by DVD/CD media
2	Channel Buttons To select a video input channel
3	REC LED Displays the recording status
	COPY LED Displays the copy status
	HDD LED Displays the running HDD
	NET LED Displays the network connection
	EVENT LED Displays event detection
4	Power To turn the power on/off
5	USB port For connecting with USB memory or mouse
6	REC To start or stop manual recording
	MULTI To change the DIVISION in live or playback mode
	SEQ To run or stop a user sequence
	COPY To enter copy mode
	SEAR To enter search mode
	PTZ To start or stop the PTZ function
	FUNC To enter the function menu
	RELAY Manual On/Off button for relay
	MON To change the monitor
	MENU To enter the menu
	ESC To exit the menu or close a pop-up window
7/8	Enter/Play ▶ To enter playback mode or select a menu
	◀/REW ◀◀ To move or select in the menu and to change the replay speed in reverse direction in playback mode
	▶/FWD ▶▶ To move or select in the menu and to change the replay speed in forward direction in playback mode
	▲/Pause II To move or select in the menu and pause live/replay video
	▼/Stop ■ To stop replay in playback mode
9	Jog/Shuttle STEP function control, Playback direction change, Playback speed control

Item	Description
1	DVD-Multi (for Backup) Backup for recorded data by DVD/CD media
2	Channel Button To select video input channel (GDV-C4416A : 1 ~ 16ch GDV-B8832A : 1 ~ 32ch)
3	REC LED Displays the recording status
	COPY LED Displays the copy status
	HDD INT Displays the running HDD for internal HDD
	HDD EXT Displays the running HDD for external HDD
	NET LED Displays network connection
	EVENT LED Displays event detection
4	Power Turn the power on/off
5	USB port For connecting a USB memory or a Mouse
6	REC To start or stop manual recording
	MULTI To change the DIVISION in live or playback mode
	SEQ To run or stop a user sequence
	COPY To enter copy mode
	SEAR To enter search mode
	PTZ To start or stop the PTZ function
	FUNC To enter the function menu
	RELAY Manual On/Off button for relay
	MON To change the monitor
	MENU To enter the menu
	ESC To exit the menu or close a pop-up window
	LOCK To lock the front key
7	Enter/Play ▶ To enter playback mode or select a menu
	◀/REW ◀◀ To move or select in the menu and to change the replay speed to reverse direction in playback mode
	▶/FWD ▶▶ To move or select in the menu and to change the replay speed to forward direction in playback mode
	▲/Pause II To move or select in the menu and pause live/replay video
	▼/Stop ■ To stop replay in playback mode
8	Jog/ Shuttle STEP function control, Playback direction change, Playback speed control

Rear view of GDV-B2208A:

No.	Input/ Output name	Description
1	Ground	Ground between DVR & external device
2	CH1~8	BNC input for camera connection GDV-A4416A : 16EA, GDV-B2208A : 8EA
3	Loop out	BNC output (Loop)
4	Monitor/Spot	BNC connection for monitor output
5	Audio Input (RCA)	RCA connection for audio input
6	Audio Output	Speaker output terminal
7	Ethernet	For network connection (RJ-45)
8	eSATA	eSATA external storage connection
9	DVI OUTPUT	Output for DVI monitor connection
10	RS-232C D-Sub	Text equipment, Keyboard connection
11	Termination Ohm	Termination Ohm for Com2, Com3
12	Relay/Serial	Connection for Relay and Serial (RS-485)
13	Sensor IN	Input for external sensor
14	FAN	Cooling system against overheating
15	Power connector	Socket for AC100V~AC240V power cord

Rear view of GDV-A4416A:

No.	Input/ Output name	Description
1	Ground	Ground between DVR & external device
2	CH1~16	BNC input for camera connection GDV-A4416A : 16EA, GDV-B2208A : 8EA
3	Loop out	BNC output (Loop) for camera connection
4	Monitor/Spot	BNC connection for monitor output
5	Audio Input (RCA)	RCA connection for audio input
6	Audio Output	Speaker output terminal
7	Ethernet	For network connection (RJ-45)
8	eSATA	eSATA external storage connection
9	DVI OUTPUT	Output for DVI monitor connection
10	RS-232C D-Sub	Text equipment, Keyboard connection
11	Termination Ohm	Termination Ohm for Com2, Com3
12	Relay/Serial	Connection for Relay and Serial (RS-485)
13	Sensor IN	Input for external sensor
14	FAN	Cooling system against overheating
15	Power connector	Socket for AC100V~AC240V power cord

Rear view of GDV-C4416A & GDV-B8832A:

No.	Input/ Output name	Description
1	Power connector	Socket for AC100V~AC240V power cord
2	CH1~16	BNC input for camera connection
3	Loop out (CH17 ~ 32)	BNC Loop for GDV-C4416A BNC input (CH17 ~ 32) for camera connection for GDV-B8832A
4	Monitor 1~4	BNC connection for monitor output
5	Audio input(RCA)	RCA connection for audio input
6	Audio output	Speaker output terminal
7	Ground	Ground between DVR & external device
8	Ethernet	For network connection (RJ-45)
9	Storage	For external HDD connection
10	eSATA port	For eSATA external HDD connection
11	DVI OUTPUT 1,2	Video output port to connect a PC monitor
12	Com1	RS-232C D-SUB
13	Com2,3	For RS-485
14	Relay	Relay Connection terminal
15	Sensor IN	Input for external sensor
16	D-Sub Audio port	D-Sub port for audio
17	Fan	To exhaust internal heat

Remote Control:

It is possible to use all functions of the DVR with the remote control,. If several DVRs are set with unique ID numbers, they can be controlled with one remote control. To use the remote control, it is necessary to set first the ID which you want to use. Keep pressing the ID button repeatedly (up to max. 16 times) and use it for matching DVR & ID.

No.	Item	Description
1	ID	To select a Remote Control ID
2	LOCK	Not used
3	COPY	To indicate the copy menu, to copy recorded data to USB
4	BACKUP	Not used
5	RELAY ON	To turn a relay manually ON
6	RELAY OFF	To turn a relay manually OFF
7	SEQ	Auto sequencing
8	MULTI	To change the division
9	ZOOM	To run digital zoom
10	SEARCH	To indicate the search menu
11	CHANNEL BUTTONS	To select a channel
12	SELECT	Not used
13	+10	In case of selecting a number over 10 (+10 + 1)
14	MON	To change the monitor
15	REC	To start or stop manual recording
16	MENU	To enter the menu screen
17	HELP	Not used

No.	Item	Description
18	< / REW	Move the setting menu in left direction/REW
19	> / FWD	Move the setting menu in right direction/FWD
20	^ / PAUSE	Move the setting menu in top direction/PAUSE
21	v / STOP	Move the setting menu in bottom direction/STOP
22	▶ / PLAY	Playback
23	ENTER	To select a menu
24	EXIT	To cancel the setting, exit the menu
25	FAST REWIND (◀◀)	Speedy replay in reverse direction
26	REWIND PLAY (◀)	Replay in reverse direction
27	FORWARD PLAY (▶)	Replay in forward direction
28	FAST FORWARD (▶▶)	Speedy replay in forward direction
29	STOP (■)	To stop replay
30	STEP REVERSE (◀)	Replay in reverse direction by each frame
31	STEP FORWARD (▶)	Replay in forward direction by each frame
32	PAUSE ()	To freeze playback
33	PTZ	PAN/TILT/ZOOM Control
34	LOAD PRESET	To read preset
35	SAVE PRESET	To save preset

4.2. Installation and Connection

Connecting the camera:

Connect the CCTV camera to the DVR using the BNC cable as shown below:

- The video type for all channels should be either NTSC or PAL. Do not combine them with each other.
- The DVR sets the video signal's impedance (75Ω) automatically. The Impedance is set to 75 Ω basically. When connecting a device to video output, the impedance will be changed to "Hi-z" status.
- The Video Type (NTSC/PAL) should be directly set after booting the DVR. The order of the camera recognition starts with Ch1 up to Ch8 (Ch16 or Ch32) and the 1st recognized camera type will indicate all other camera types.

Connecting the monitor:

Connect either a CCTV monitor with a BNC cable to the DVR as shown below, or connect the monitor with a DVI cable through the DVI port. Use a DVI-VGA adapter or a DVI-HDMI adapter if your monitor does not support a direct DVI connection. (A DVI-VGA adapter is included in the package.)

Connecting Audio:

Connect the audio signal to the DVR using the RCA cable or a D-Sub connector as shown below:

Supplying Power:

Connect the power cable as shown below:

- When supplying the DVR with power, the DVR starts booting automatically.
- In order to cut off the power, press the power switch on the DVR front for 5 seconds. When a pop-up window appears, select "YES" to shut down the DVR.
- For supplying the DVR with power again, push the Power button.

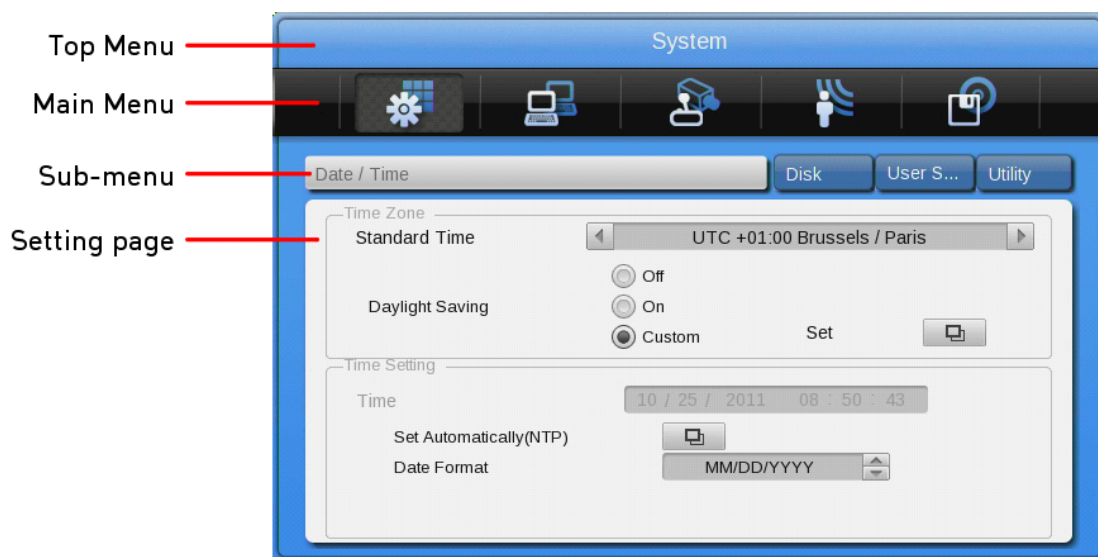

4.3. Running the OSD menu

The OSD can be controlled with the keypad on the front panel of the DVR, with a remote control or with an USB mouse. In this manual we will refer to the keys of the front panel, as the procedure with a remote control and a mouse is almost identical.

4.3.1. OSD Menu Configuration

Press [MENU] on the keypad on the front to open the configuration menu as shown below:

(1) Main Menu : The selected tab is shown in bright colour and the related sub-menu will be shown on the left, below the tab. To move to the previous/next tab, use the [◀/▶] arrow buttons. To move to a sub-menu, press the [Enter] key.

(2) Submenu : The selected sub-menu is shown as a tab title and the related setting will be shown. To move to the previous/next tab, use the [◀/▶, ▲/▼] arrow buttons. To move to the related setting, press [Enter]. To move to an upper main menu, press the [ESC] button.

(3) Setting page : The selected tab is shown in blue. To move to the previous/next tab, use the [◀/▶] or [▲/▼] arrow button and press the [Enter] key for value setting. When setting the value is a word, a dialogue box to edit the word will open. When setting the value is a number, it should be set with using [◀/▶] or [▲/▼]. Press the [ESC] button when the value is set. With the [ESC] button it is also possible to move to the upper sub-menu.

Dialogue box to edit a word:

The dialogue box to edit a word is shown below. It is possible to input both letters and numbers.

Keep pressing the [▲/▼], [◀/▶] arrow buttons until the word is typed in, then press [Enter]. In case of deleting press [←], for spacing press the [→] button. To exit the dialogue box, press [Enter] after having finished the word input.

4.3.2. Setting the remote control

Setting the ID of the DVR:

When controlling several DVRs with one remote control, set the Remote Control ID as follows:

- (1) Press the [MENU] button.
- (2) Select "System" by using the [▶] arrow button and press [Enter] or the [▼] button.
- (3) Select "Utility" by using the [▶] arrow button and press the [Enter] button.
- (4) Select "Remote Controller ID" and press [Enter].
- (5) Select a value using the [◀/▶] arrow buttons and press [ESC].
- (6) Press the [ESC] button to return to monitor mode.

NOTE:

Up to 16 DVRs can be controlled with a single remote control. If you do not use a remote control, set the Remote Controller ID to "All".

Selecting an ID with the remote control:

If there are several DVRs with unique ID numbers, they can be controlled with one remote control. To select a specific DVR, keep pressing the ID button of the remote control until you hear a signal sound for the duration of 2 seconds.

Operable range of the remote control:

Loading the batteries into the remote control:

The remote control requires two AAA-type batteries. Please refer to the following installation steps.

1. Remove the battery cover.

2. Take care that the poles (+/-) are correctly positioned.

3. Replace the battery cover.

4.3.3. Different configurations

Basic configuration:

Advanced configuration:

Connection to an USB storage device for backups:

Internet/Intranet configuration:

4.3.4. Basic Settings

Viewing Image:

When powered on the DVR starts automatically and displays a basic 16ch-split or 8-split screen (GDV-B2208A).

NOTE:

After booting the recorder, by default a prompt for entering the password will appear. The default admin password is: 1234.

Setting Date & Time:

- Press the [MENU] button and select "System" when the OSD menu appears.
- Select "Date/Time" and press the [Enter] button.

Time Zone:

- (1) Select "Time Zone" using the [◀/▶] or [▲/▼] arrow buttons and press the [Enter] button.
- (2) Select "Time Zone" using the [◀/▶] arrow buttons and press the [ESC] button.

Daylight saving time:

- (1) Summer Time is only selectable for the Time Zones which use Daylight savings.
- (2) Select "Daylight Saving" using the [◀/▶] or [▲/▼] arrow buttons and pressing the [Enter] button.
- (3) Select On/Off using the [◀/▶] arrow buttons and pressing the [ESC] button.

Custom DST:

You have the option to customise the DST switch to your needs. You can freely choose when the DST will happen. You can fix the DST switch to either a fixed day (e.g. The second Tuesday in March) or a fixed date (23rd of March). You can also select the time when the switch should happen.

NTP:

- (1) Select NTP if you want to enable the NTP Function.
- (2) Select "Client or Server or Both" using the [◀/▶] or [▲/▼] arrow buttons and press the [Enter] button.
- (3) Select "Public or Both" using the [◀/▶] arrow buttons and press the [ESC] button in 'Client or Both' mode.
- (4) Enter the 'Server IP address' when you set the next server as Local.
- (5) Set Server and Communicate cycle with Interval.

Date Format:

- (1) Select "Date Format" using the [◀/▶] or [▲/▼] arrow buttons and press the [Enter] button. Select a value using the [◀/▶] arrow buttons from YYYY/MM/DD, MM/DD/YYYY, DD/MM/YYYY.
- (2) Press [ESC] after finishing the value setting.

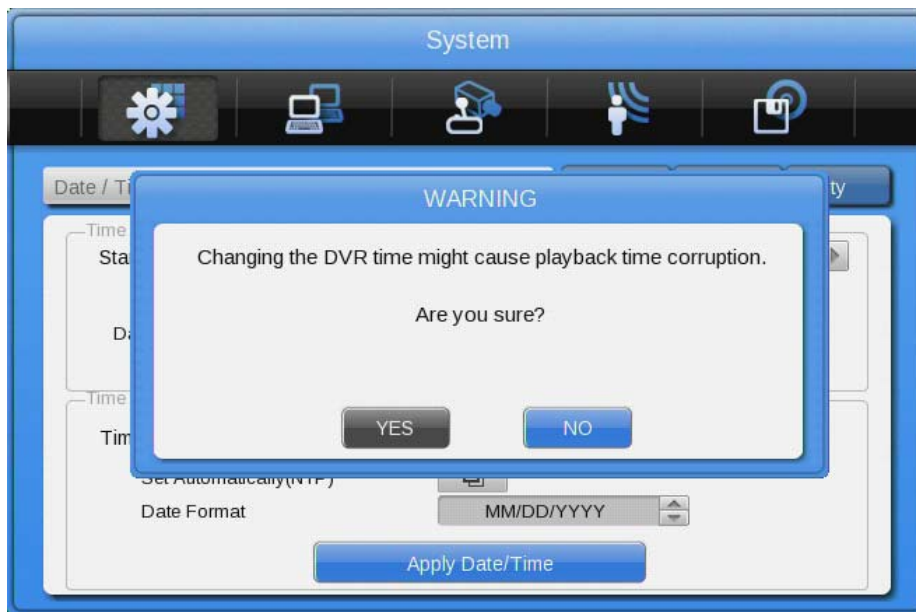

Time:

- (1) Select the Date and Time using the [◀/▶] arrow buttons and set a value using the [▲/▼] arrow buttons.
- (2) Press [ESC] after finishing the value setting.

Important Notification!

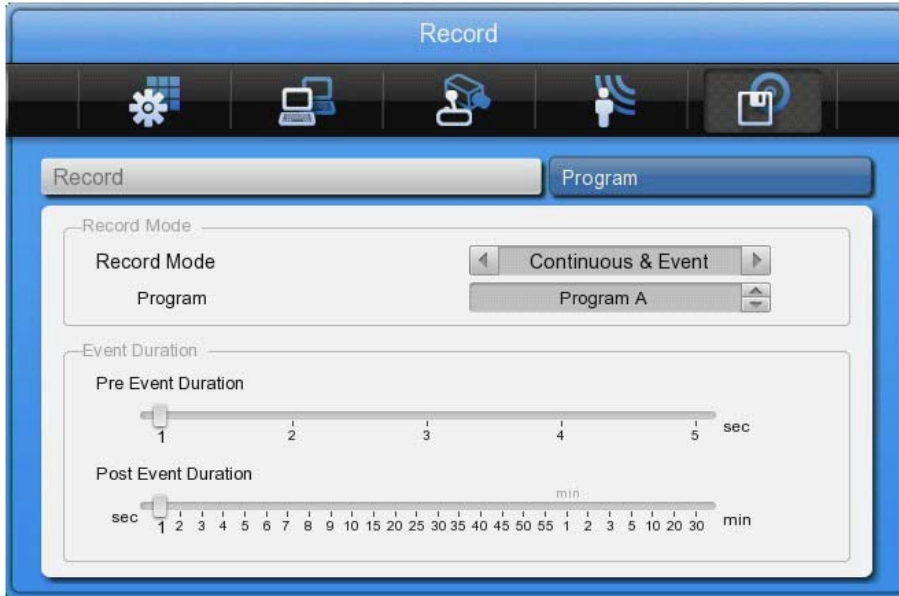

Most setting values are applied automatically, when exiting the related menu page. In contrast, "Date" & "Time" settings are not applied automatically because they may critically affect the file system of the recorded HDD. To apply Date/Time settings confirm with the [Apply Date/Time] button.

- (1) Select "Apply Date/Time" using the [◀/▶] or [▲/▼] arrow buttons and press [Enter]. Then a warning message will appear as shown below;
- (2) Select "YES" using the [◀/▶] or [▲/▼] arrow buttons, then press the [Enter] button. To cancel, press the [ESC] button.

Record settings:

- (1) Press the [Menu] button and select "Record" when the OSD menu appears.
- (2) Move to the sub-menu "Record" by pressing [Enter].
- (3) Select the Record Mode (Continuous & Event, Manual & Event or Schedule & Event).
 - Continuous & Event will record all the time and the [REC] button is disabled
 - Manual & Event will record if an Event occurs and if the user presses the [REC] button
 - Schedule & Event will record during a defined schedule & when an event happens
- (4) Set the pre-alarm and post-alarm recording times.

Program Setting:

Set the resolution, the frame rate and the quality for each channel for normal recording and event recording in the "Program" submenu of the "Record" menu depending on the model you are using.

Schedule Setting:

Set the recording mode as "Schedule & Event" and set the date, the time and the program with which you want to record. You can record at different dates with different programs. Start a schedule index by clicking with the mouse or use the direction buttons to select the start and end time. The [daily] button will copy the index to every day of the week. In overall you can create up to 50 schedule indexes.

NOTE:

If the recording settings are finished correctly, the "REC LED" on the front will flicker. In addition, a [S] on the status tab will indicate that all channels are recording.

4.4. Connecting and Configuring Ports

4.4.1. Wire Handling

When connecting a wire to a terminal block, follow the instructions below. Note the different types of wire that can be used.

- Stranded wire : Peel 8~10 mm of the wiring cover and solder it. Wire gage should be AWG 22~26.

- Solid wire : Peel 8~10 mm of the wiring cover and solder it. Wire gage should be AWG 20~26.

4.4.2. Inserting & removing wires

To insert & remove wires in the Terminal Block use a screwdriver as shown below in the diagram.

4.4.3. Connecting and configuring sensor connections

Specification:

Spec.	Input Ch.	Transistor input GDV-B8832A, GDV-C4416A, GDV-A4416A : 16EA, GDV-B2208A : 8EA
	Input type	N.C., N.O. supported
	Supported sensor	Dry contact sensor
	Way of connecting	Connect the trimmed wire to terminal block
Performance	Available input pulse range	Minimum 500ms
	Output current	Typical DC 12mA

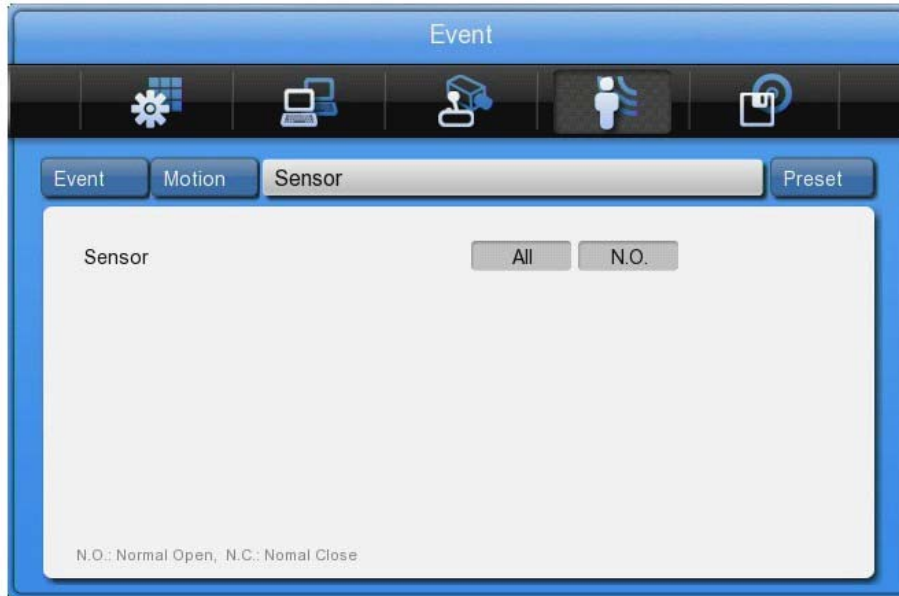

Connecting a sensor:

Refer to the following images for connecting S1 ~ S16 (S8, S4). It shows how to connect a dry contact (please also refer to "Wire Handling").

Sensor Settings:

- (1) Press the [Menu] button and select "Event" when the OSD menu appears.
- (2) Move to the sub-menu "Event" by pressing [Enter].

Setting for all sensors:

This setting is used to set the status of all sensors. The sensors can be set to Off, or Normal Open (N.O.) / Normal Close (N.C.) type.
Select All and set the type.

Setting for a single sensor:

This setting can be used when for each sensor a different setting is required.

- (1) Select a sensor and press the [Enter] button.
- (2) Select the sensor type.
- (3) Press [ESC] after the value is set.

Connecting and setting of relays:

Specification:

In order to run the relay output of the DVR normally, the following conditions are required.

Spec.	Output Ch.	2EA relay outputs
	Output type	Dry contact
	Connecting type	Trimmed wire
Performance	DC	30V 1A
	AC	125V 0.5A

Connecting relays:

Connect R1~R2 with reference to the following images which show how to connect a warning light. Please also refer to "Wire Handling".

Relay settings:

The DVR can activate relays from different events, such as sensor activation, motion detection or the loss of a video signal. It is also possible to set system errors like Disk error, Disk full, authentication fail and DDNS registration as triggers for such relay activation. If the Event Check is set to Custom, a schedule for the event check can be created. In the case of using the control center software through a network, the relays can also be activated from a remote location.

Serial Port Configuration:

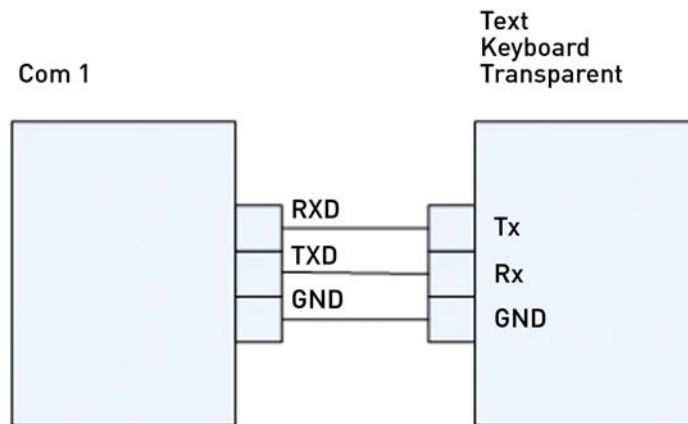

Configuring serial ports for Pan/Tilt/Zoom cameras:

The DVR supports the control of PTZ cameras over the COM port. For a list of supported protocols, please refer to the list on the OSD configuration menu. The following image shows how to connect a PTZ camera to RS485 (COM2/COM3). When using another serial port, connect it while referring to the connection diagrams below. Please also refer to "Wire Handling".

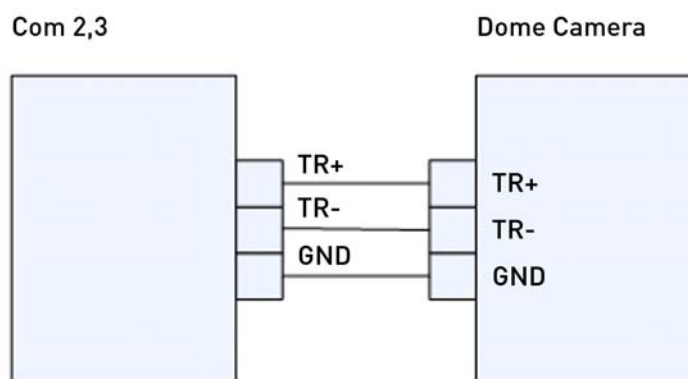

Serial communication port diagram:

COM1 Connection (RS-232)

COM2/COM3 Connection (RS-485)

The following PTZ protocols are supported by the DVR:

Model Name	Manufacturer
BOSCH AutoDome, TC8560X-4	Bosch
PELCO(P), PELCO(D)	Pelco
Sony EVI-D3x	Sony
VT VPT-4x	VT
AD SpeedDome	AD
SungJin SJ372R1	Sungjin
Samsung SCC641	Samsung Electronics
Panasonic WV-CS850	Panasonic
SDZ160/330, Samsung SPD, Keyboard SCC3000, Samsung SRX-100B	Samsung Techwin
LG GAC-PT2	LG
Merit-Lilin FastDome	Merit
Elmo PTC200C	Elmo
Canon VC-C4	Canon
HTC-230S	Dongyang Unitech
Honeywell 755/655, HRX-2000, ScanDome2	Honeywell
RVision	RVT
Elbex	Elbex
VIDO	VIDO
VICON	Vicon
Hunt	Hunt
ORX-1000	Sysmenia
Fine CRR-1600	LiveEye
Tokina	Tokina
Kodicom KRE	Kodicom
Nuvico	Nuvico

Serial Connection Settings:

You can set up the serial port and the PTZ configuration in the "Device" menu.

Under "Device" > "Serial", you can set the protocol, port, baud rate, parity bit, stop bit and data bit, corresponding to the settings in the PTZ camera.

After completion, switch to "Device" to select a desired channel from the camera menu, and connect the Camera to the corresponding serial port by selecting the PTZ Port under the PTZ menu. Here you can also set up if the PTZ should make use of its Home position, the Idle Time and the PTZ Address.

Connection to external device via Serial port:

Text input device connection (ATM / POS / Access Control):

Using the COM1/RS232 port, TEXT DATA can be recorded with a synchronised POS/ATM.

Like shown in the picture above, connect the COM1/RS232 (9pin D-Sub) and configure the Serial Connection and Text in the "Device" menu.

Serial (COM1) Setup:

- (1) Select "Device" in the OSD menu and move to this sub-menu by pressing [Enter].
- (2) Select COM1 and configure the name/type of the device.
- (3) Set up the value of Baud Rate/Parity/Stop bit/Data bit with the device.

Text Setup:

- (1) Select "Device" in the OSD menu, and move to this sub-menu by pressing [Enter].
- (2) Select "Text" and configure the relevant information.
- (3) The DVR supports 2 different protocols (Starfinger 007 & VSI-Pro-Hydra) but can also be configured manually.

NOTE:

Since an external device cannot be recognised before being configured in this menu, please ask your dealer for the correct data.

Connecting USB devices:

The USB port can be used for simple video copying (within 1 hour) to an USB memory device. It is recommended to use a device whose specifications are the same as below.

USB Spec.	Ver. 2.0
Device	USB Memory Stick, USB HDD
Voltage/electric current	Max. 200mA per DC 5V / Port

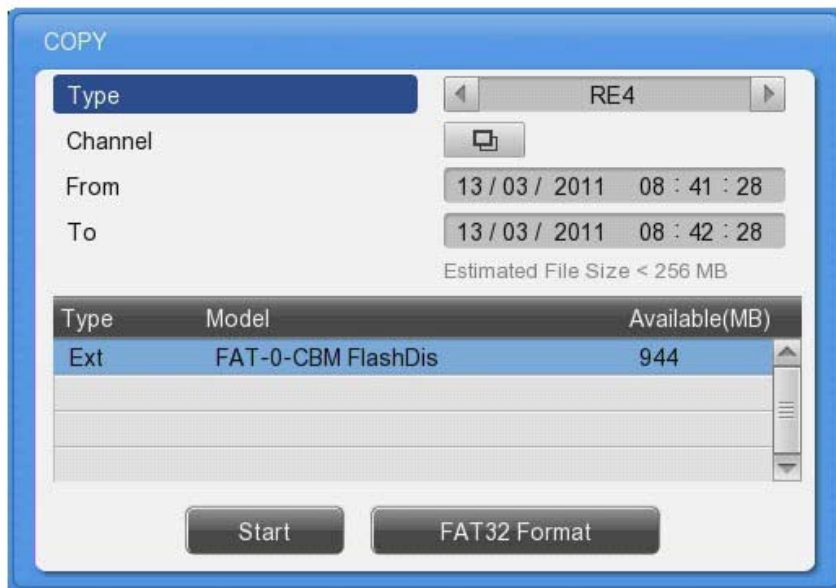

NOTE:

The USB device has to be formatted with FAT32 to be recognised by the DVR.

USB Storage for Copy

In the case of normal connection, if executing the Copy menu, the USB device will be automatically recognised as shown below. The detailed procedure to back up data is explained in chapter 7.3. Copy.

Connecting video outputs:

If the Video signal is looped through, the DVR notices this and sets the end resistance automatically. Please ensure the correct end resistance setting of the device connected to the video out signal.

Connecting audio devices:

There are 4 RCA Audio Inputs and 1 RCA Output. The models GDV-B8832A and GDV-C4416A are also supplied with a 12 D-sub Audio input option.

4.4.4. HDD

Please refer to the following list for compliant HDDs:

Brand	Model Number	Capacity
HITACHI	HCS5C2020ALA632	2TB
HITACHI	HCS5C1050CLA382	500GB
HITACHI	HCS5C1010CLA382	1TB
WESTERN DIGITAL	WD5000AVDS-63U7B1	500GB
WESTERN DIGITAL	WD10EURS-630AB1	1TB
WESTERN DIGITAL	WD20EURS-63Z9B1	2TB
WESTERN DIGITAL	WD20EVDS-63T3B0	2TB
WESTERN DIGITAL	WD15EVDS-63T3B0	1.5TB
WESTERN DIGITAL	WD10EVVS-63M5B0	1TB
WESTERN DIGITAL	WD10EVVS-63E1B1	1TB
WESTERN DIGITAL	WD10EVDS	1TB
WESTERN DIGITAL	WD10EVCS	1TB
WESTERN DIGITAL	WD7500AAKS	750GB
WESTERN DIGITAL	WD5000AVVS-638B0	500GB
WESTERN DIGITAL	WD5000AVVS-63H0B1	500GB
WESTERN DIGITAL	WD5000AVJS	500GB
WESTERN DIGITAL	WD3200AVVS-63L2B0	320GB
WESTERN DIGITAL	WD2500AVJS	250GB

HDD registration and format:

After mounting the HDD and booting the system, the "Disk Manager" will execute automatically. If not, please check the connectivity of the HDD.

The Disk Manager can be manually executed in the menu "System" under "Disk".

(1) Press the [Enter] button in "Disk Manager".

(2) Using the [▲/▼] buttons, select the new HDD (Displayed [No] on Enabled item) and press [Enter].

(3) If you see the message for format, select [Yes]. If the HDD is already correctly formatted, this might not be necessary.

(4) Press [ESC] to exit the "Disk Manager".

4.4.5. Remote monitoring and controlling

Using the GRUNDIG Control Center Software, the DVR can be controlled and monitored over an internet/intranet connection.

Ethernet connection:

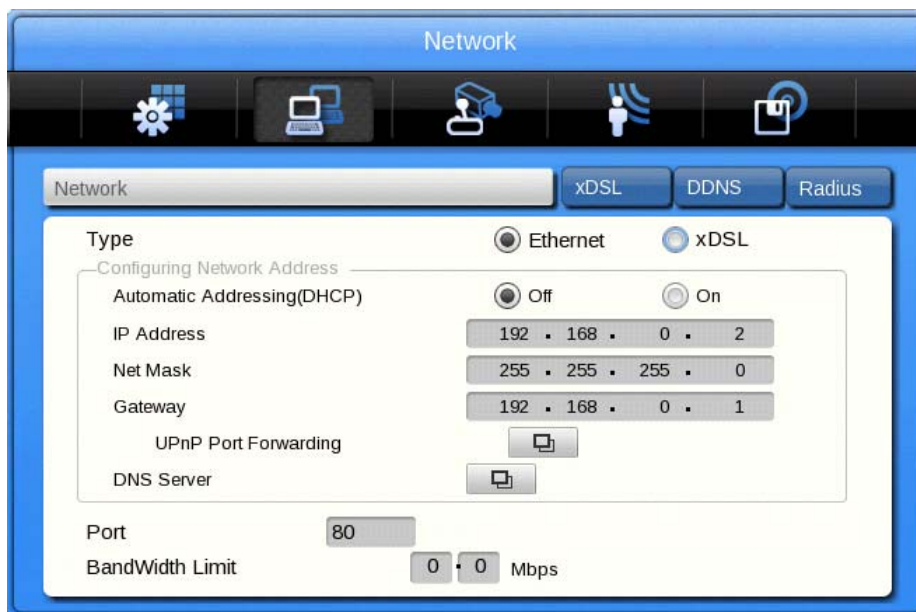

(1) Cut the power off.

(2) Connect the Ethernet cable to the DVR and the Hub/Switch.

(3) Turn the power on.

Network configuration:

Network:

Set Type as Ethernet and put in the IP Address, Net Mask, Gateway and DNS. The numbers can be changed by pressing the UP and DOWN direction keys or the scroll wheel of the mouse.

xDSL:

First, change the Ethernet Port under Network settings to xDSL and then move to the xDSL menu. After this, just put in the ID and Password for your PPPoE connection. This data will be provided by your DSL provider.

DDNS:

The settings for the GRUNDIG DDNS server are already filled in. You will only need to set the time interval in which the recorder should resend its IP information to the DDNS server. If your firewall and router settings are correct, you should be able to access the DVR now from anywhere in the world by using the following address:

[last 6 digits of MAC address].grundig-ddns.eu

e.g. g312d45.grundig-ddns.eu

eSATA Device Connection:

You can connect almost any eSATA device to the DVR. The DVR does not supply power to the eSATA port; therefore only devices with their own external power supply can be used.

NOTE:

The DVR will detect an eSATA connection, even though the DVR is already powered on. If not, it is recommended to connect an eSATA device as follows:

1. Power off the DVR.
2. Connect the external device to the eSATA interface.
3. Power on the external device.
4. Power on the DVR.

GDS-R04A connection:

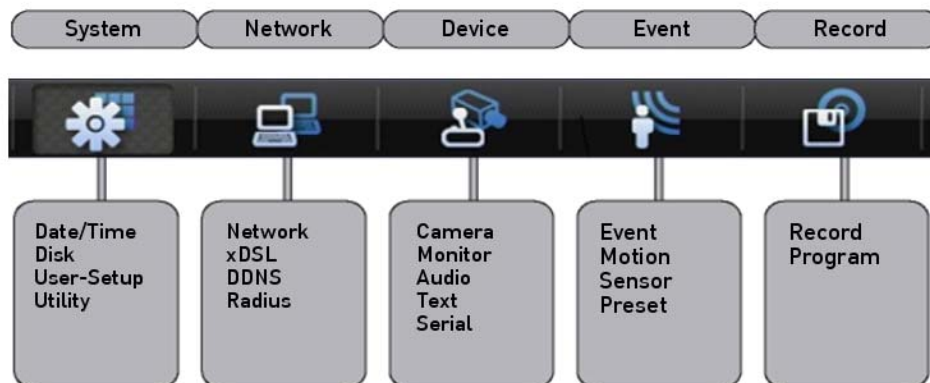

Connect the GDS-R04A with a Cat-6 cable to the [F storage] port of the DVR. For the detailed configuration of the GDS-R04A please refer to its user manual.

5. Menu Use

5.1. Menu Structure

The menu structure is shown in the image below. The settings for each menu are explained in the following chapters.

5.2. Function Menu

To execute the Function menu, click the right button of the mouse or select the 'FUNC' button on the front panel. The Function menu can be controlled by mouse or with the direction keys of the front panel. The function menu differs for Multi channel Mode, Single channel, Mode Monitor Mode and Playback Mode. Please refer to the picture below for the Function menu structure.

Function Bar in Multi-Channel Mode:

From left to right:

1. Access Main Menu
2. Switch Monitor (see the active monitor in the status bar on the bottom)
3. Select Multi Mode View
4. Start Sequence
5. Backup Menu
6. Search
7. Enter Playback Mode
8. Key-Lock function (will disable the front panel buttons of the device)
9. Log Out
10. Shutdown

Function Bar in Single Channel Mode:

From left to right:

1. Access Main Menu
2. Switch Monitor (see the active monitor in the status bar on the bottom)
3. Select Multi Mode View
4. Start Sequence
5. Digital Zoom
6. PTZ Control
7. Backup Data
8. Search
9. Enter Playback Mode
10. Key-Lock function (will disable the front panel buttons of the device)
11. Log Out
12. Shutdown

Function Bar in Playback Mode:

From left to right:

1. Switch Monitor (see the active monitor in the status bar on the bottom)
2. Select Multi Mode View
3. Backup Data
4. Take a Snapshot to an USB device (only active when video playback is paused)
5. Search
6. Fast Backward (press multiple times to change speed)
7. Stop Playback Mode
8. Play
9. Pause
10. Fast Forward (press multiple times to change speed)
11. Shutdown
12. Enable/Disable deinterlacing (only active when video playback is paused)

5.3. Factory Reset

In order to reset the system settings to factory default, go to System Setting->System->Setting, and press Factory Reset. Then a warning message will appear and after you confirmed with "Yes" the DVR will be set to factory default.

6. Monitoring

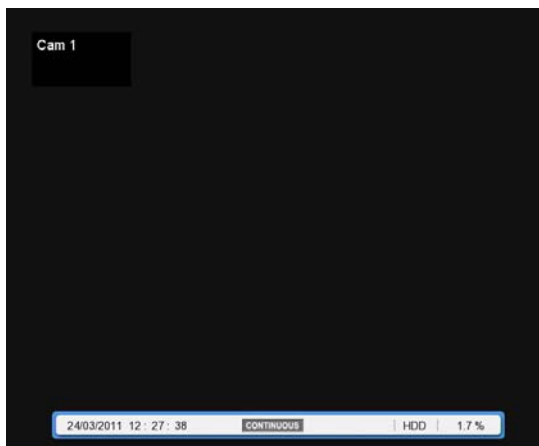

All analogue video image channels connected to the DVR are displayed on the screen after booting the DVR. It enables the user to utilise all monitoring modes of DVR. If only one monitor is connected to GDV-B8832A, the channels 17-32 can be viewed via the function Monitor Switching.

6.1. Basic Screen

After the power connection is established, the DVR will boot automatically. After booting, the user or administrator will need to put in its password. After the login, a 16 channel screen is displayed (For GDV-B8832A, GDV-C4416A, GDV-A4416A: 16 channels, for GDV-B2208A: 8 channels).

6.2. Single Full Screen Mode

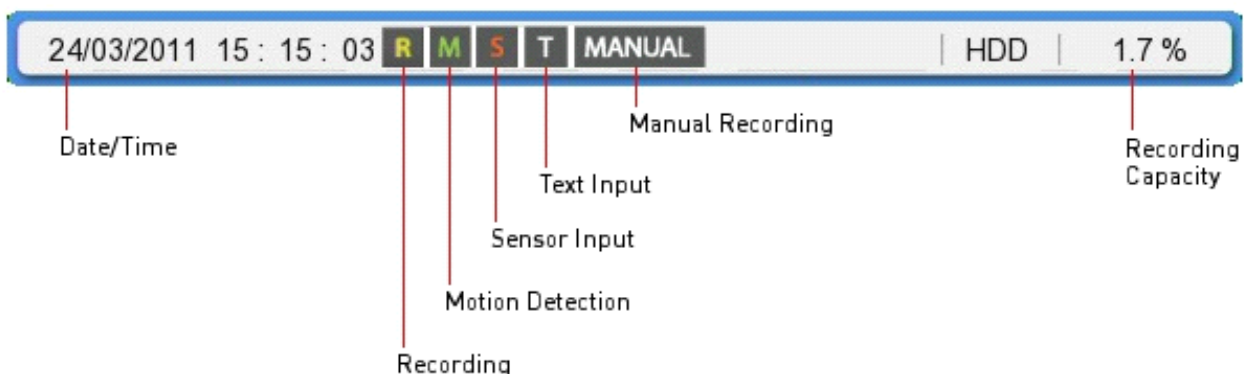

Press the wanted channel number or click with the mouse on the wanted channel. Double-click with the mouse to return to the previous multi-channel view. You can select different Multi-channel views by clicking the [MULTI] button on the front panel or the [Display] button in the function bar.

6.3. Multi Screen Mode

Press [MULTI] for multi channel display or click the "Display" icon in the Function menu. Every time you press the [MULTI] button, the screen mode will change. For GDV-B8832A, GDV-C4416A and GDV-A4416A the modes are 1~4, 5~8, 9~12, 13~16, 4C, 1~9, 8~16, 1~10 and all 16 screens. For GDV-B2208A the modes are 1~4, 5~8, 4C and all 8 screens.

6.4. Screen Description

The status bar from the monitoring screen shows the DVR's current status which includes Date/Time, Record, Motion/Sensor Detection, Manual Record, Text Input and HDD's Record capacity.

6.5. Sequence Mode

By pressing the [SEQ] button a user defined sequence will start switching between single channels and division views after a preconfigured time.

6.5.1. Sequence Mode Settings

The settings for the Sequence Function are configured under "Device" > "Monitor" in the OSD Menu.

Select "Seq. Switching (sec)" and set a value from 1 sec. to 60 sec. When OFF is set, the auto switch mode is disabled.

The user can define up to 16 sequence steps. As shown in the picture above, in the 16ch DVR the user can choose a channel from 1 to 16 or multichannel views for each sequence step. Respectively, you can choose only from 8 channels with the 8 channel DVR and 32 channels with the 32 channel DVR. All models support up to 16 sequence steps.

6.6. Event Screen

When an event is detected, the green colour [M] and red colour [S] will be displayed in the status bar. If [M] is displayed, the camera name will be displayed in green colour, and it will turn back to yellow when Motion Detection ends. If [S] is displayed, the camera name will be displayed in red colour, and it will turn back to yellow when the Sensor Event ends.

In the "Monitor" menu you can define an Event Pop-up time. If this is set, the DVR will display only the channels on which an event occurred. For example, when on 3 channels motion was detected, a 4 division screen will be displayed on the screen, including these 3 channels. Press any button to return to the original channel, or wait until the Event Pop-up time ends.

1. If Event Pop-up (sec) is set to "Off", the Event Pop-up will not operate.
2. If Event Pop-up (sec) is set to "Keep", it does not return to the previous screen until you press a button.

6.7. Zoom Screen Mode

- In the single full screen mode, press the [FUNC] button and the D-Zoom button, then use the [+] button to zoom in the image.
- The default zoom screen is located in a central position when pressing the [ZOOM] button. The Zoom image can be shifted to the left and right in 18 steps and from top to bottom in 12 steps.
- Use the direction keys to move the image selection.
- Press [-] to return to the original screen.

6.8. Pause Live Screen

- Press [PAUSE] to pause the live screen and press [PAUSE] again to return to live screen.

6.9. PTZ Control

Connect a PTZ controller to the DVR and set the relevant protocol in the "Serial Setup" menu and the corresponding camera menu, then the PTZ of the camera can be operated while live monitoring is activated. To pan and tilt a PTZ camera, use the direction keys from the DVR's front panel or the mouse. You can access focus, zoom and presets of the PTZ camera by pressing the PTZ button on the DVR's front panel or clicking on the PTZ icon in the Function menu. Below you find a list of supported protocols.

Model	Manufacturer
BOSCH AutoDome, TC8560X-4	Bosch
PELCO(P), PELCO(D)	Pelco
Sony EVI-D3x	Sony
VT VPT-4x	VT
AD SpeedDome	AD
SungJin SJ372R1	SungJin
Samsung SCC641	Samsung Electronics
Panasonic WV-CS850	Panasonic
SDZ160/330, Samsung SPD, Keyboard SCC3000A, Samsung SRX-100B	Samsung Techwin
LG GAC-PT2	LG
Merit-Lilin FastDome	Merit
Elmo PTC200C	Elmo
Canon VC-C4	Canon
HTC-230S	DongYang Unitech
RVision	RVision
Elbex	Elbex
Honeywell 755/655, HRX-2000, HTX-3000, ScanDome2	Honeywell
VIDO	VIDO
VICON	Vicon
Hunt	Hunt
ORX-1000	Sysmenia
Fine CRR-1600	LiveEye
Tokina	Tokina
Kodicom KRE	Kodicom
Nuvico	Nuvico

-
- Press the button of the desired channel, or select the channel with the mouse.
 - Press the PTZ button from the front panel or click on the PTZ icon in the Function menu with the mouse.
 - The PTZ menu (Zoom/Focus, Load Preset, Save Preset) will appear.
 - Then press the [Enter] button or click on the mouse.

6.9.1. Pan/Tilt

The Pan/Tilt function is directly activated after you have chosen a PTZ camera in single monitor mode. You can control the PTZ with the front panel direction buttons, or with the USB mouse by clicking on the screen. Depending on the distance to the central cross, the PTZ will move into the direction of the mouse click.

6.9.2. Zoom/Focus

This menu is used to control the Zoom & Focus function in real-time monitoring mode.

- Select Z/F (Zoom/Focus) from the PTZ mode.
- Control Zoom/Focus through the direction keys on front of the DVR or use the scroll wheel of the mouse.

6.9.3. Loading Preset

This menu is used to move the PTZ camera into a Preset position during real-time monitoring mode.

- Use the Up / Down buttons or the mouse wheel to select the Preset Number.
- Once Preset is configured, please select [Load] and then press [Enter].

6.9.4. Save Preset

This menu is used to set a new Preset position during real-time monitoring mode.

- Control the PTZ camera location by using the 'Pan/Tilt' menu and the 'Zoom/Focus' menu.
- Use the Up / Down buttons or the mouse wheel to select the Preset Number.
- Once the preset position is configured, select [Save] and then press [Enter].

6.9.5. Auxiliary On

This menu is used to utilise specific functions of a PTZ device during real-time monitoring mode.

- Use the Up / Down buttons or the mouse wheel to select the Aux Number.
- Select the relevant Number button for this specific function (Up to 16 functions of the PTZ camera can be controlled with the Aux Function.)

6.9.6. Auxiliary Off

This menu is used to stop operation of a specific function of the PTZ device.

- Use the Up / Down buttons or the mouse wheel to select the Aux Number.
- Select Off and press the [Enter] button or click on the mouse.

6.9.7. Menu

With this function you can connect to the PTZ camera's menu. Use the Up/Down/Left/Right and the Enter key on the front panel of the DVR to adjust settings in the menu, and press the [ESC] button to exit the menu.

NOTE: After leaving the PTZ OSD menu, you will need to inform the DVR about this, as the DVR is not able to recognise this by itself. Therefore, you will find an [Exit] button on the screen. You can click with the mouse or use the [PTZ] button on the front panel to activate this button. Afterwards, the PTZ menu of the DVR will be visible again and can be left by right-clicking with the mouse or pressing the [ESC] button.

7. Playback

7.1. Playback Mode

7.1.1. Playback on Standard monitor (16 / 9 / 4 division)

- Please press the [PLAY] button in monitoring mode or click the [PLAY] button in the Function menu with the mouse.
- When pressing the [PLAY] button or the [FWD] button, the video plays in forward direction at 1× speed.
- When pressing the [REW] button, the video plays backwards at 1× speed.
- When pressing the Playback button in a multi-division monitor mode, it plays the recorded data for all viewable channels.

7.1.2. Playback function

PLAY:

Playback 1× speed Multichannel video will play when pressing the [PLAY] button in Multichannel monitor mode.

PAUSE:

Pause the video temporarily.

STOP:

Stops the Playback and the DVR returns to live view.

FWD:

Playback speed will be changed (x1, x2, x4, x8, x16, x32, x64, x1/2, x1, x2, x4 – in order). When pressing the [FWD] button in live view mode, the DVR plays back the recorded video from 1 minute ago. Playback speed can be changed by pressing the [FWD] button.

REW:

Reverse playback speed will be changed (x1, x2, x4, x8, x16, x32, x64, x1/2, x1, x2, x4 – in order). When pushing the [REW] button in the live view mode, the DVR plays back the video from 1 minute ago. Playback speed can be changed by pressing the [REW] button.

STEP FORWARD:

When pressing the [FWD] button while playback is paused, the video will jump to the next frame. Press [PLAY] to return to normal playback mode.

STEP REWIND:

When pressing the [REW] button while the playback is paused, the video will jump to the previous frame. Push [PLAY] to return to normal playback.

1/2 REWIND:

Plays at half speed in reverse direction.

1/2 FORWARD:

Plays at half speed in forward direction.

Jog Dial:

The Jog Dial can be used to control the video playback. The outer wheel controls the speed of the playback. The inner wheel can be used to control the Fast-forward function and the Rewind function.

7.2. Search Mode

The DVR supports 4 different modes to search for video material (Time, Calendar, Event, Thumbnail). Press the [SEAR] button on the front panel or the search icon in the Function menu to access the Search menu.

7.2.1. Time Search

Start-REC Time:

The date and time of the first recording

End-REC Time:

The date and time of the last recording

Search Time:

Select the date and time to play back

Search:

Start the search

Select the date and time to search for. After pressing the [Search] button, the video will play back at the requested position.

7.2.2. Calendar Search

Month:

Select the Month and Year to search for. Use the direction keys or the scroll wheel of the mouse to change the month/the year.

Day:

Select the Day to search for. Use the direction keys or double-click with the mouse to change the day.

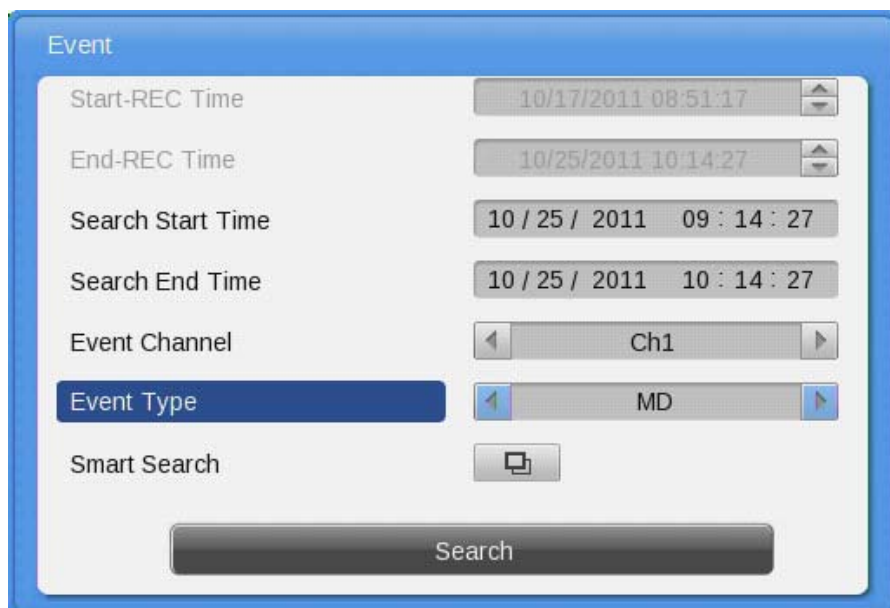

Hour:

Select the time and push the [Enter] button or double-click with the mouse to start the video.

NOTE: The orange markings represent the recorded videos. The dark orange markings represent an occurred event.

7.2.3. Event Search & Smart Search

The user can search all channels or only one channel. He can decide to search for all events or only for motion detections or sensor alarms. The user can select a start time and end time within he wants to search. The results will be displayed in an additional window. Select the result you want to play back and push [Enter] or scroll the mouse. The video will play back at the desired position.

Start-REC Time:

Starting date and time of the first recording

End-REC Time:

The date and time of the last recording

Search Start Time:

Input the start date and time for search with the direction buttons, press [Enter] and change the value with the Up / Down buttons. With the mouse, click and scroll the wheel.

Search End Time:

Input the end date and time for search with the direction buttons, press [Enter] and change the value with the Up / Down buttons. With the mouse, click and scroll the wheel.

Event Channel:

Select the channel for the search:

- GDV- B8832A: from Ch1 to Ch32
- GDV-A4416A & GDV-C4416A: from Ch1 to Ch16
- GDV-B2208A: from Ch1 to Ch8

Event Type:

Select the event type for the search. Choose between:

ALL, MD, SENSOR, V- LOSS, TEXT

Smart Search:

If you select only one channel and motion detection as event, you will be able to define a motion area that will be searched. Even if you have motion detection activated for the full screen, only results in this area will be displayed. This can be very helpful if you want to minimise search results.

7.2.4. Thumbnail Search

Use this search mode to search by thumbnail preview pictures. Select the channel, date and time and the time interval to create 16 thumbnails of the video.

Channel:

Select the channel and change the value with the direction keys or the mouse wheel.

Start Time:

Input the date and time for the starting point and change the value using the Up / Down direction keys or the mouse wheel.

Interval:

Set the interval value using the Up / Down direction keys or the mouse wheel. You can change the interval from 1-60 and you can choose between seconds, minutes, hours & days.

View video:

When pressing the [Search] button, 16 thumbnail previews will be shown based on the start time and interval. Press [FUNC] to return to the search or use the mouse wheel.

Select video:

Use the direction keys to move the blue selection frame and press the [Enter] button to start playback. Alternatively, select a thumbnail with the left mouse button and start the playback with an additional mouse click.

7.3. Copy

The Copy function is used to back up video material on USB devices or CD/DVDs. For USB devices you can select between the RE4 (multichannel) and AVI (only 1 channel) video format and store it on a FAT32 formatted device. In the user authorisation you can define which user has the right to back up the video. For this please refer to chapter 8.1.3. User Setup.

To use the copy function, press [COPY] or click the Copy button in the Function menu.

NOTE: The multi-channel format always includes a miniplayer.exe file that can play back the video without the need to install any program. You have also access to the logfile with this miniplayer.

NOTE: When accessing the Copy function from Playback, the actual playback time will be copied to the Start time field and the Stop time field will be 1 minute later. With these settings an easy adjustment of the backup time is possible.

7.3.1. CD/DVD

This is the copy function if you use a recordable CD or a DVD. Please insert the recordable CD or DVD first before you start the backup menu. The CD or DVD will be automatically detected.

Type:
Select CD/DVD by using the direction keys or the mouse wheel.

Channel:
In a pop-up window the user can select some or all channels to be backed up. Enter or use the mouse wheel to access the channel selector.

From:
Select the start date and time to copy using the Up / Down direction keys or the mouse scroll wheel.

To:
Select the end date and time to copy using the Up / Down direction keys or the mouse scroll wheel.

Select Disk:
Select the media to copy using the [Enter] button on Select Disk.

Start:
Starts to copy. Press the [Start] button with [Enter] or click with the left button of the mouse.

Please refer to the supported media list below.

DVD-R manufacturer (DVD+R is not supported):

- Mitsubishi (×16 recommended)
- TDK (×16 recommended)
- Imation (×16 recommended)
- Sony (×16 recommended)

CD-R Manufacturer:

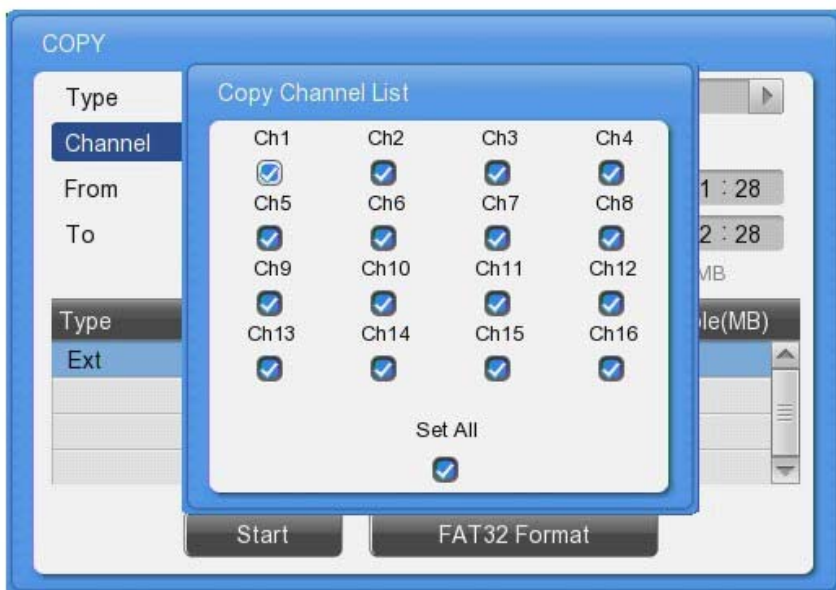

- Mitsubishi (×52 recommended)
- TDK (×52 recommended)
- Imation (×52 recommended)
- Sony (×48 recommended)

7.3.2. RE4

The RE4 format can be backed up on external HDDs and USB Flash drives. Together with the video a Mini player will be copied to the Storage device to be able to view the RE4 format. You can also open the RE4 file with the GRUNDIG Control Center.

Select the channel you want to record and press [Enter] or use the mouse to open the channel selector as shown below.

Type:

Select RE4 using the direction keys or the mouse wheel.

Channel:

To pop up the channel selection window, press [Enter] or use the mouse.

Select Channel:

The user can select some or all channels. After selecting the channel, press [Enter] or click the left button of the mouse.

From:

Set the start date or time to copy. Use the direction keys or the mouse wheel to change the values.

To:

Set the end date or time to copy. Use the direction keys or the mouse wheel to change the values.

Select disk:

Select the media you want to copy to. Press [Enter] on the Disk list or click the mouse.

Start:

Starts the backup. Press [Enter] or click the mouse.

NOTE: If the backup is interrupted, the backup files will not be playable on a PC.

7.3.3. AVI

In the AVI format the user can back up a single channel video. Together with the video file the System and Event log of the selected time frame will be copied to the external storage.

Type:

Select AVI using the direction keys or the mouse wheel.

Channel:

Select the channel to copy with the direction keys or the mouse wheel.

From:

Set the start date and time you want to back up. Use the direction keys or the mouse wheel to change the values.

To:

Set the end date or time to copy. Use the direction keys or the mouse wheel to change the values

Select disk:

Select the media on which you want to back up the AVI file. Press [Enter] and select the media or click the mouse.

Start:

Starts the backup. Press [Enter] or click the mouse.

8. Configuration

8.1. System Setup

Time, Disk and Authority settings and miscellaneous settings can be configured here.

8.1.1. Date/Time

The Date and Time setting should be configured prior to any recording.

The Time configuration is very important to protect the recording data. Changing the time during recording is not recommended. The factory default setting for the time is "UTC 00:00 Dublin".

Time Setup:

Caution: While recording, changing the system time will affect a time change for all previously recorded video data. Therefore, we recommend to back up the recorded video before changing the system time.

- Press "Main Menu" in the Function menu or the [MENU] button on the front panel.
- Select the "System" menu.
- Select "Date/Time" in the System menu. The Date/Time configuration will be opened.
- Use the directional keys or the mouse to change the values.

Time Zone / Standard Time:

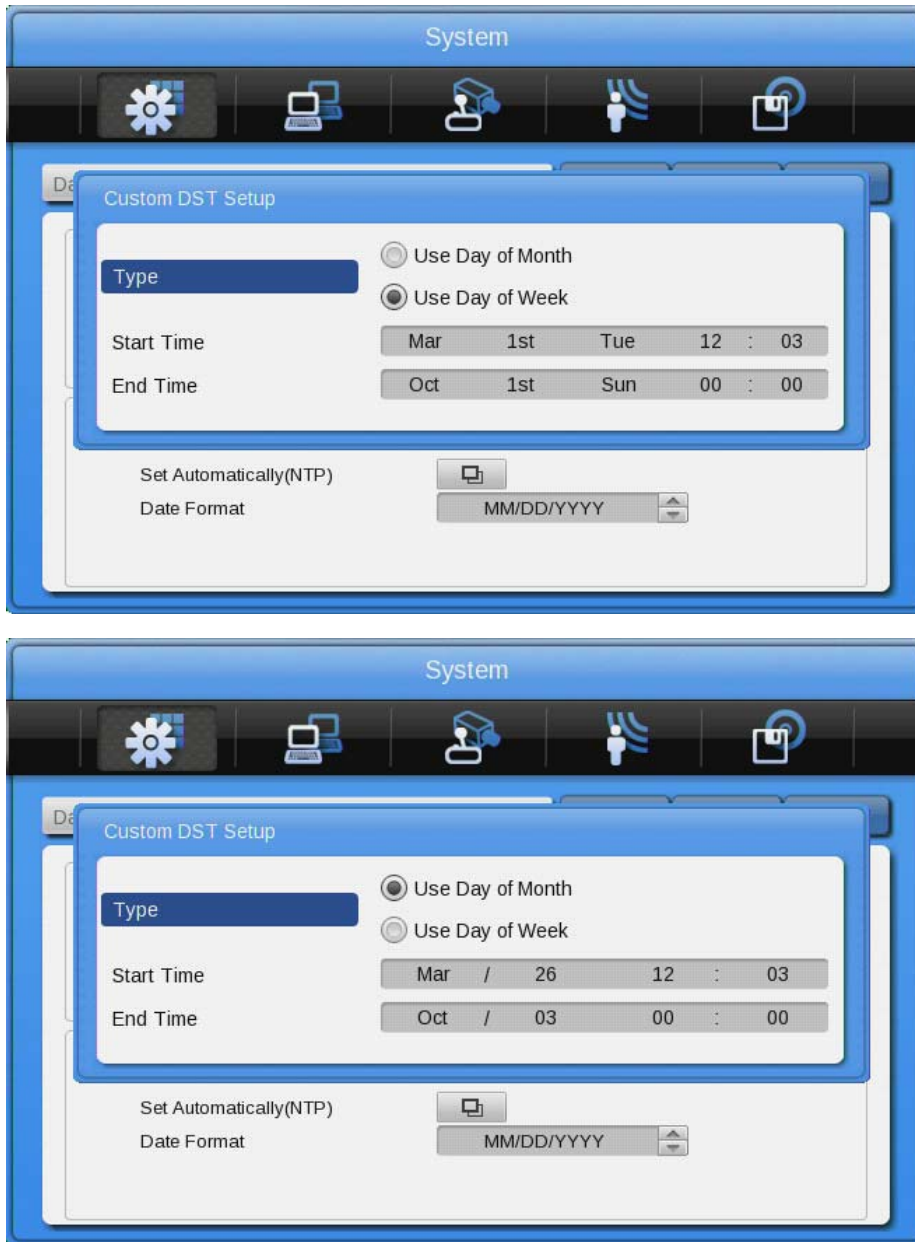

Use the Left / Right direction keys or the mouse wheel. To return to the previous menu, press [ESC] or click the right mouse button.

Daylight Saving:

This menu is synchronised with the time zone configuration menu. When a daylight saving area is set, this function is activated. The daylight saving applicable area is working in conformity with the time zone of Microsoft Windows.

Custom DST Setup:

You can also use a custom DST. Select a fixed day of a week (first Tuesday of March) or the day of a month (24th of March) to select when the switch should happen. You can also define the exact time, when it should happen. This can be used if you want to change the time not in the middle of the night, but maybe on the noon of the next day, so you have enough time to search for any events using the “old” time, for example.

Date format (Type):

Change the date format between “MM/DD/YYYY”, “YYYY/MM/DD” and “DD/MM/YYYY” by using the Left / Right direction keys or the mouse wheel.

Start / End Time:

With the Left / Right direction keys, you can move to year, month, day, hour in order. Each configuration can be changed with the Up / Down direction keys or the mouse wheel.

Apply:

When pushing the "Apply Date/Time" button, you will see the message box shown below.

NOTE:

Except for the "Date/Time" configuration, all configurations are saved automatically. The "Date/Time" configuration can have a critical effect on the HDD recording file system, therefore the user has to confirm these changes. Press "Yes" if you want to confirm or press "No" and return to the previous menu.

NTP Setup / Set Automatically (NTP):

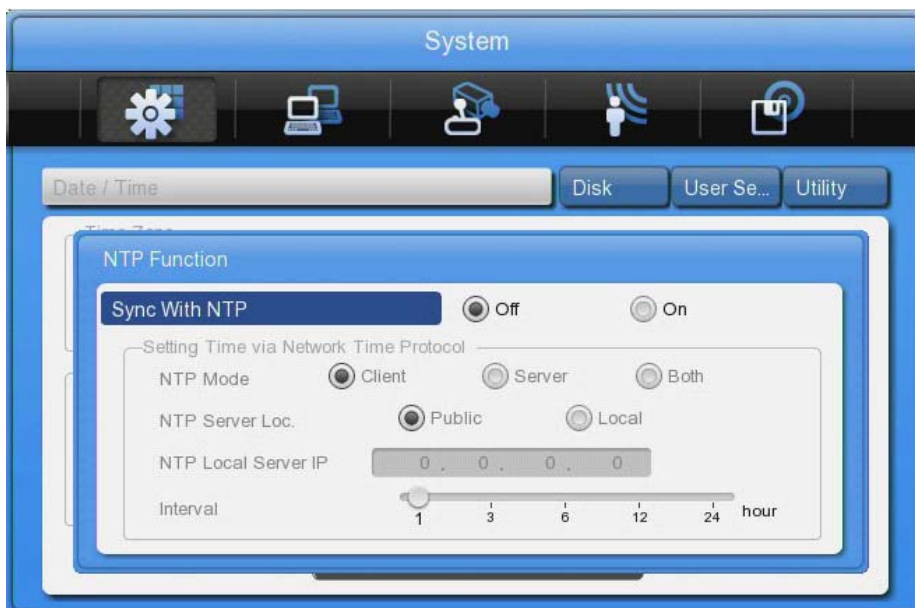

The NTP (Network Time Protocol) synchronises the time of all connected devices. The DVR can be set to client mode or server mode or to both modes at the same time.

Sync with NTP:

Enable or disable the NTP function.

NTP Mode:

Configure the NTP mode of the DVR – Client / Server / Both

Caution: When using the NTP client mode, the user must set the NTP to "On".

NTP Server Loc.:

If the DVR is in client NTP mode, this function is enabled. Configure the IP address of a local network NTP server or select "Public" if the NTP server is a public one.

NTP Local server IP:

Input the IP address of the local NTP server or a DVR that is working in NTP server mode.

Interval:

Configure the interval of the time synchronisation.

8.1.2. Disk

In the "Disk" menu everything regarding the hard disk of the DVR can be configured. Here you can also use the Disk Manager to format HDDs.

Overwrite (Auto Deletion):

If there is no space left in the HDD, old data will be overwritten automatically.

Disk Full Alarm Warning:

If the mounted Disk has reached the selected percentage, an alarm warning will be send to the user.

Block Playback:

The Block Playback function can be used to decline access to recorded video material. If the Block Playback is set to 2 days, only the last 2 days can be seen and backed up with the recorder. Everything before these 2 days cannot be accessed.

Delete:

The Block Playback function only denies the playback access to the recorded data, but the data is still available on the HDD. If you have menu access, you can get access to the playback by deactivating the Block Playback afterwards. If it is required to delete the data, you can activate the Delete function and all data will be erased permanently.

Disk Manager:

“Disk Manager” is the menu for the management of internal or external HDDs (hard disk drives). You can see the type, name, the bad block status and the size of the HDD in this menu. You can also select if the HDD is enabled for recording or not.

NOTE: If you enable a HDD to record, you will be asked whether the HDD should be formatted.

Type:

Displays the location or type of disk (Int A (Internal A HDD), Int B (Internal B HDD), Ext (External HDD)).

Model:

HDD model name

Bad Blk:

Displays the number of bad blocks of the HDD.

Size:

Displays the HDD size in MB.

Enabled:

Enables a HDD for recording (“Yes”: Enabled / “No”: Disabled).

To enable a HDD, select it and change the status from NO to YES, by either pressing the “Enter” button on the front panel or changing it with the mouse wheel.

The following request window will pop up:

Caution: This Disk can be added without format. Nevertheless, do you want to format this disk?

- If you select NO, the HDD will not be formatted.

NOTE: If the HDD was already used in a GRUNDIG DVR and was formatted correctly, it will be available for recording even if you selected NO. All previously recorded videos will be also available.

- If you select YES, all data on the HDD will be erased and the HDD will be used for recording.

If you set the HDD status to NO, a window will pop up:

Disk will be removed.

- If you select YES, the message “Recording disk removed” will appear at the bottom of the screen and the status of the HDD is set to NO. The HDD will not be used for recording.

- If you select NO, the HDD will be used without any change and the message “Disk reused for recording” will appear at the bottom of the screen.

Disk Status:

In the "Disk Status" menu you can check the temperature and status of the installed HDDs.

Mirroring (only GDV-C4416A & GDV-B8832A):

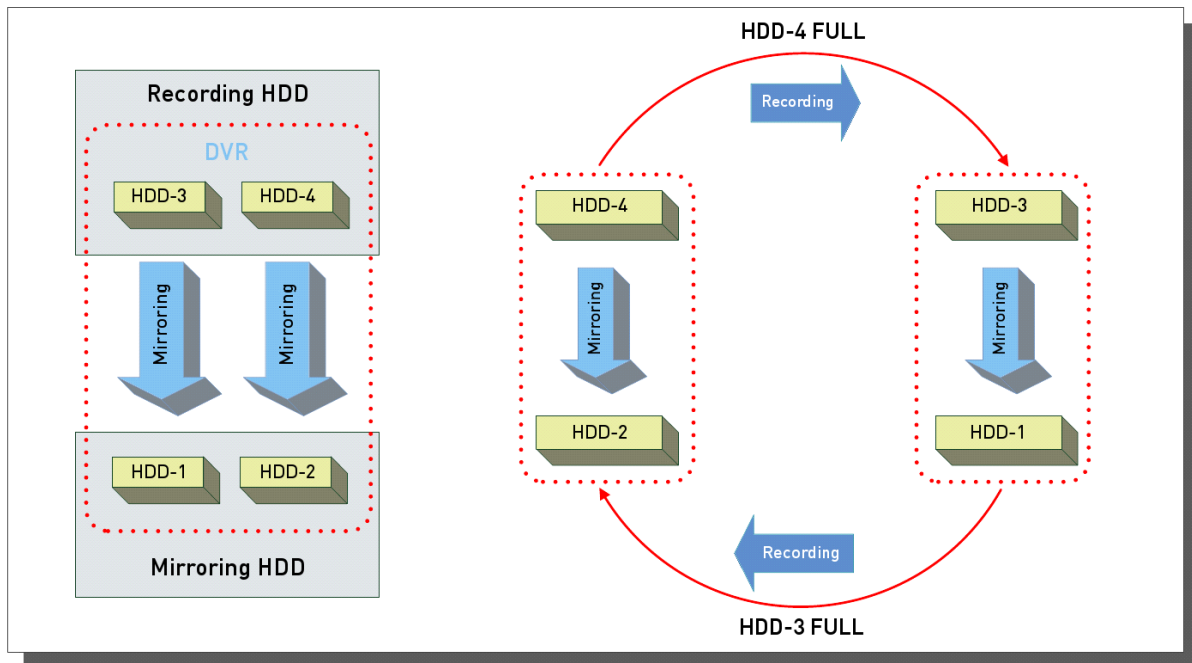

In the mirroring option you can activate the RAID function. You can choose between three options. You need to use identical HDDs to activate this option and ensure a flawless working condition.

- DVR: The HDDs inside the DVR will be connected as one RAID (Redundant Array of Independent / Inexpensive Disks). Please note that HDD1 and HDD3 will form one pair and HDD2 and HDD4 another pair.
- GDS: If you have attached the Network storage device GDS-R04A, it can be set up to mirror its data here.
- Both: All HDDs inside the DVR and inside the GDS-R04A storage will be mirrored.

Please note that you need to disable all HDDs before you can activate the mirroring. All HDDs also need to be formatted.

After you have activated the mirroring the mirror HDD will be shown with an (M) at the end of its name. To format both HDDs you need only to format the partner HDD.

1) Disk Mirroring configuration:

NOTE:

The recording performance of the DVR will be reduced when the Disk Mirroring function is activated.

GDV-C4416A:

GDS Mirroring Recording Setting		
Resolution	IPS	Quality
D1	15 ~ 1	Q5 ~ Q1
Half	30 ~ 1	Q5 ~ Q1
CIF	30 ~ 1	Q5 ~ Q1

GDV-B8832A:

GDS Mirroring Recording Setting		
Resolution	IPS	Quality
D1	7 ~ 1	Q5 ~ Q1
Half	15 ~ 1	Q5 ~ Q1
CIF	30 ~ 1	Q5 ~ Q1

2) Maximum recording performance per model with DVR and GDS-R04A mirroring function

GDV-C4416A:

All Mirroring Recording Setting		
Resolution	IPS	Quality
D1	7~1	Q5 ~ Q1
Half	15 ~ 1	Q5 ~ Q1
CIF	30 ~ 1	Q5 ~ Q1

All Mirroring Recording Setting		
Resolution	IPS	Quality
D1	4 ~ 1	Q5 ~ Q1
Half	7 ~ 1	Q5 ~ Q1
CIF	15 ~ 1	Q5 ~ Q1

8.1.3. User Setup

The user setup is only visible for the administrator. Users can only change their passwords here.

In the user setup you can define which user has which rights. You can choose that users are only allowed to access defined channels and can only execute defined functions. Here you can change the user name and the password.

User ID:

Here you can select which user you want to edit.

User Name:

Change the user name here. This name can then be used to enter the DVR directly or over the Ethernet connection.

Change Password:

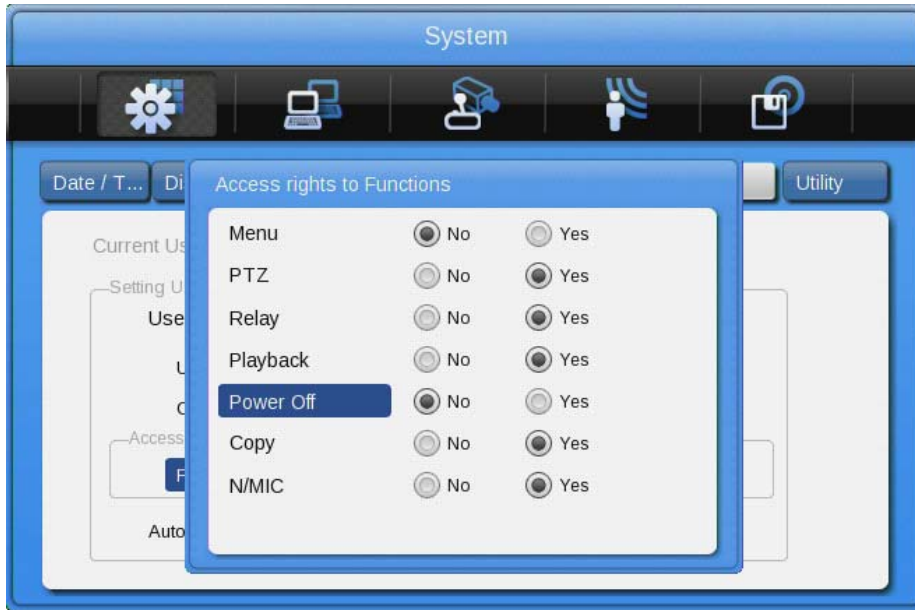

The password can be up to 8 digits long. To ensure you did not misspell the password, you have to enter the password twice. Press "Change" when the password is finished. After that, a message window will be shown and you have to confirm the password change.

Access rights:

Here you define which rights the user has. The administrator has always all of the rights and this cannot be changed. In the default settings the users do not have any right to see any channel or do anything. The administrator needs to give them rights first.

Functions:

Here you can define which functions of the DVR the user can access.

Menu: Gives the user the right to access the configuration menu. (The users are not allowed to change the user rights or to perform a factory reset.)

PTZ: If set to YES, the user has the right to control PTZ cameras.

Relay: If set to YES, the user has the right to activate the relays of the DVR.

Playback: If set to YES, the user has the right to access the Playback.

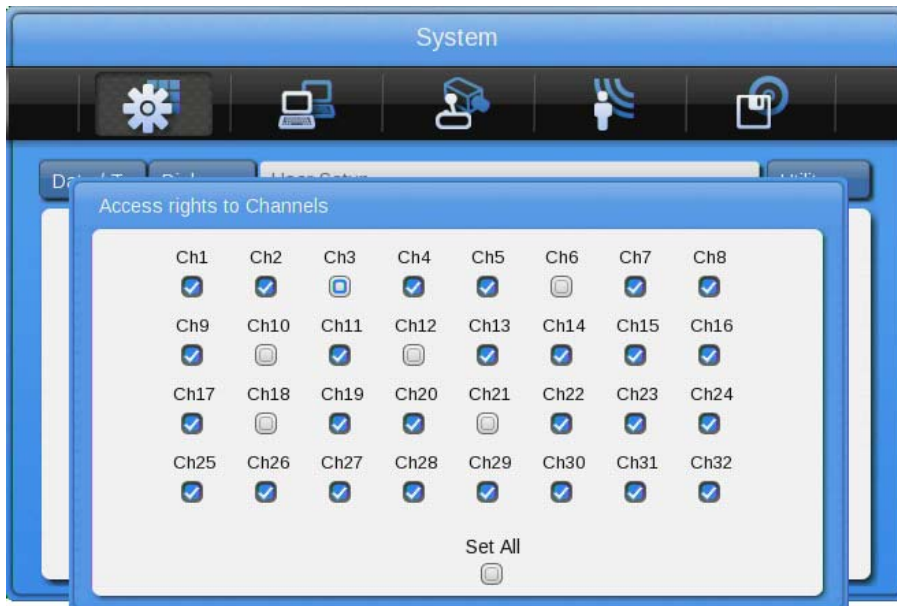

Power Off: If set to YES, the user has the right to turn off the DVR.

Copy: If set to YES the user has the right to backup video.

N/MIC: If set to YES, the user has the right to use the microphone function over the network.

Channel right:

Here you can define which channels the user can see under Live & Playback. Covert channels will also be invisible in search results and backup files.

Auto Log-out time(Min):

Every user can have its own auto-log-out time. With this function you can, for example, limit the admin access to 2 minutes. So even if you forget to log-out, the access to the DVR will not be possible without the admin password. But you can also create a user with infinite log-out time (set to 0), so that you can have a "guest" account that will show defined channels all the time without any special function rights.

NOTE:

The password prompt will be visible after the DVR has started and when nobody is logged in. After that, the user that is logged in will have access to all the rights defined in user setup.

Change the Password:

Select Change P/W for the user whose password should be changed. The password input box will be displayed. The password can be set with the direction keys on the front of the DVR or with the mouse in the text input window.

NOTE:

The Admin Password is "1234" in factory default. For user 1 to 10 the password is (in order) "1111", "2222", ... and for user 10 it is "0000".

Change the Password:

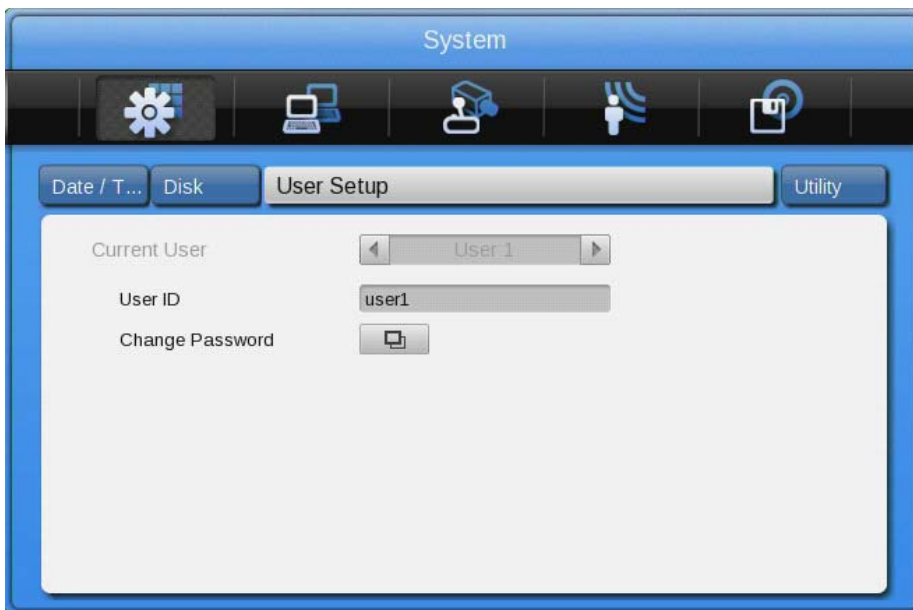

Select Change P/W for the user whose password should be changed. The password input box will be displayed. The password can be set with the direction keys on the front of the DVR or the mouse in the text input window.

User setup page for users:

A user will see a different page than the administrator. He will be only able to change his own password:

8.1.4. Utility

Configure the name of the DVR, the remote control ID and Language.

DVR Alias:

Set the name of the DVR. This name will be shown when accessing the DVR via a network.

DVR Keyboard ID:

This menu is for setting the address of the keyboard when using all functions of the DVR with the keyboard. Factory default is "1". If the user wants to control various DVRs with one keyboard, each address should be set with a different value.

Remote Controller ID:

Maximally 16 remote control IDs can be set. One remote control can be used to manage all the 16 DVRs.

Registration order for the remote control:

1. Make the remote control point in the direction of the DVR.
2. Press the ID button several times to match the ID of the remote control to the DVR.
3. If the IDs are matched correctly, the DVR buzzes.
4. Now you can use the remote control.

Language:

Select the language you would like to use.

Firmware Update:

You can update the firmware by a USB Memory device.

- Insert a USB memory device including the firmware file to the USB port.
- Press the Firmware Update button.
- Select [YES] in the pop-up window.

NOTE: Only the administrator is allowed to perform a Firmware Update.

- The system will reboot.
- Firmware update is done.

System Log:

The system log shows the boot status of the system and any changes regarding users and the DVR configuration.

Factory Reset:
Set all configurations back to factory default.

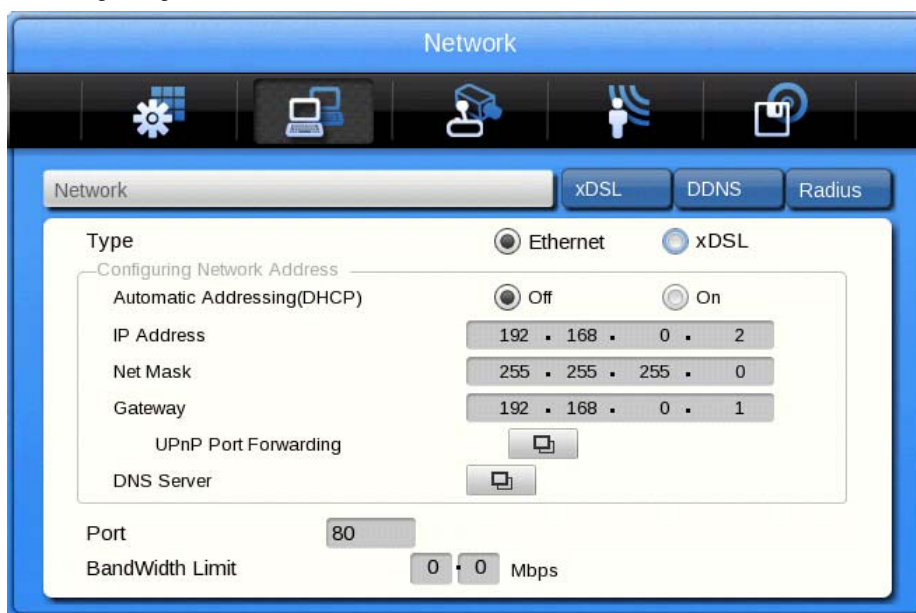

NOTE: Only the administrator is allowed to perform a factory reset.

System Information:

The System information contains 2 pages of information about the system. On the first page you will see all the relevant system information like firmware and model type. The second page shows you the current data amount used for the single channels.

8.2. Network

This is the menu for configuring the network.

Type:

Configure the type of Network (Ethernet/xDSL) connection. If the DVR is connected to a local network, you can change the configuration directly in the fields below. If the DVR is connected by xDSL (PPPoE), please make the configuration in the xDSL submenu.

Automatic Addressing (DHCP):

With DHCP (Dynamic Host Configuration Protocol), all hosts connected to LAN can get a temporary IP address from a DHCP server.

If the LAN has an active DHCP server, this server allocates the IP address directly to the DVR.

If there is no DHCP server in the network, the IP address needs to be configured manually.

IP Address:

The IP Address is for connection between the DVR and the Control Center and also for the web connection with the WebViewer (Net Mask and Gateway need to be configured if you want to access the DVR over the Internet.)

Net Mask:

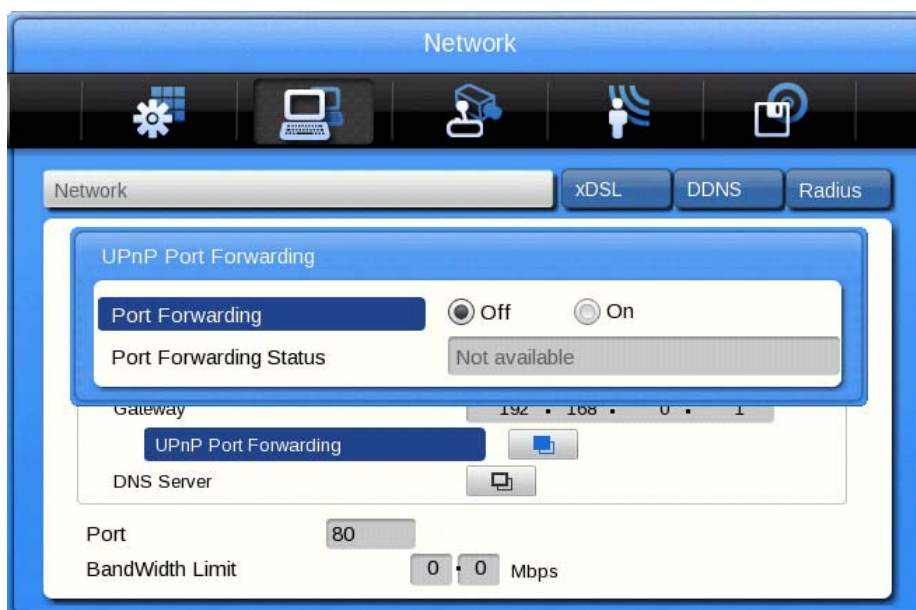

The Net Mask determines the range of the IP addresses which are available for use. You should receive the correct data from the network administrator.

Gateway:

The Gateway is necessary for different types of network connections. You should receive the correct data from the network administrator.

UPnP (Universal Plug and play) Port Forwarding:

This very helpful feature can be used if you do not want to configure your network forwarding ports manually. If activated, the DVR will instruct your router automatically to forward all requests coming to the defined port. Set the Port Forwarding to "On" to activate this feature in the Pop Up Window. The status of the UPnP forwarding will be shown in the Status field.

DNS Server:

DNS is a network service used to rename IP addresses (Domain Name Server) and it should be received from the network administrator.

Port:

The port is necessary for the connection to the Control Center Software and the WebViewer. The factory default setting is Port 80. If you want to connect to the DVR through the internet over a router, this is the port you will need to forward in your router.

Please make also sure that your firewall is not preventing the access to this port.

Bandwidth Limit:

In this menu the bandwidth used for video transmission can be limited. You can define the bandwidth between 0.03 Mbps and 99.99 Mbps. Contact the network administrator for further information on bandwidth limitation.

8.2.1. xDSL

The DVR can be connected directly to an xDSL modem and use a PPPoE connection for direct access to the Internet. If you are using this, please change the connection type to xDSL and configure the user ID and Password.

User ID/Password:

Fill in the user ID and Password.

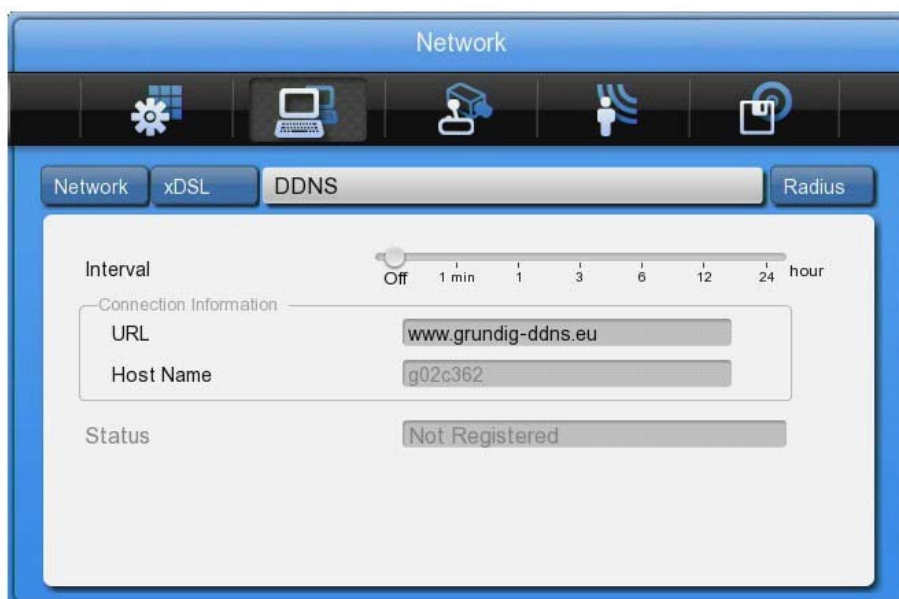

Status:

Displays the connection status of the DVR.

8.2.2. DDNS

If the DVR is connected to a Cable modem or a xDSL modem, the IP address will be changed with every connection to ISP. To connect to the DVR over the Internet you need to know this IP address. GRUNDIG supplies a DDN Server that can be used to update the IP address of the DVR. The DVR sends its latest IP address to this server and the user can then connect to this server to access its DVR.

To register the Static IP to DDNS, please refer to the following configuration.

DDNS Interval:

For a continuous registration, the register interval should be activated. According to the chosen time interval, the DVR will renew its dynamic IP information in the DDNS server regularly. If the user turns the interval off or the DVR does not transmit any data for 2 days, the data will be removed from the DDNS.

DDNS URL:

This menu is for setting a server address where the DVR can register its dynamic IP address. The DDNS address, on which GRUNDIG is operating now, is: www.grundig-ddns.eu.

You can access the DVR now over the internet and the Control Center Software through the following address:
[last 6 digits of the MAC address].grundig-ddns.eu
(example: g02c362.grundig-ddns.eu)

The MAC address is printed on the box label and on the backside of the DVR.

8.3. Device Setup

In this menu you can configure all devices that can be connected to the DVR, like cameras, monitors and keyboards.

Caution: NTSC and PAL cameras cannot be used at the same time.
If changing the camera type from NTSC to PAL, the system should be rebooted.

8.3.1. Camera Setup

Select the camera you want to configure, by selecting its channel.

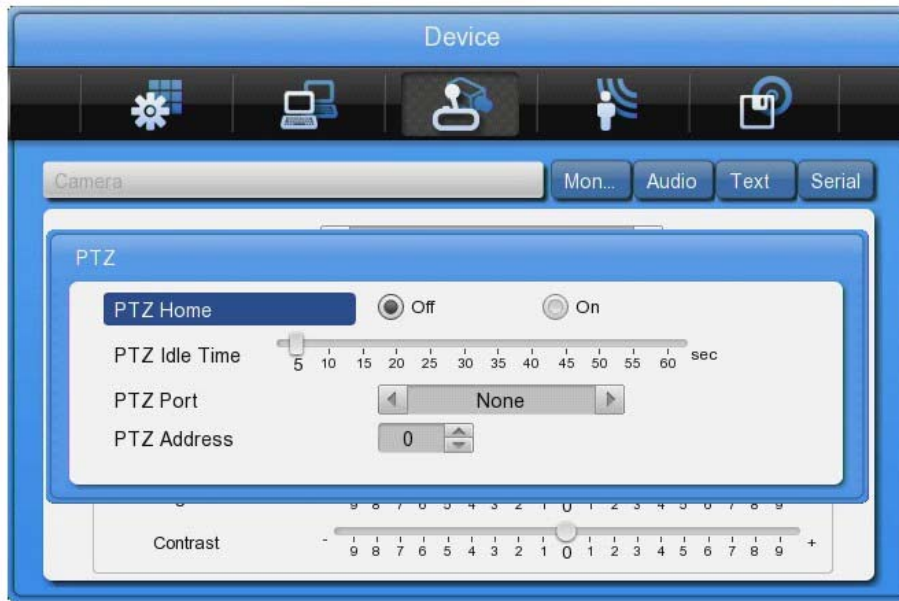

Name:

Fill in the name the camera should have. This name will be shown on the monitor and will be also shown in the GRUNDIG Control Center Software.

When pressing the [Enter] button or clicking the mouse, you can enter the camera name in the text menu.

PTZ Setup:

In this menu it is possible to carry out an additional configuration for the PTZ Address and the PTZ Port.

PTZ Home:

Enable or disable the Home function. If the PTZ is not used manually for a certain time, the camera will move back to the preset position.

PTZ Idle Time:

Set the time period after which the PTZ moves to its PTZ Home position.

PTZ Port:

Select the Port for PTZ control. The port settings need to be done in the menu under Device > Serial.

PTZ Address:

Configure the address of PTZ.

Using Channels:

Configure whether a channel is connected to a camera or not. After pressing [Enter], select a channel by using the Left / Right direction keys or the mouse wheel. Disabling a not used channel will improve recording and network transmission. Also the LED on the front of the DVR will not blink and there will be no "Video Loss" for this channel on the monitor and for event detection.

AGC (Auto Gain Control):

The AGC function can be used to control the video signal input of the connected camera. Configure, enable or disable the brightness and contrast of the video with the direction keys or the mouse wheel.

8.3.2. Monitor Setup

Configure all connected monitors. Depending on the model of the DVR and the attached monitor different options are available.

Monitor Number:

Select which monitor you want to configure. For the models GDV-B2208A and GDV-A4416A there are 2 monitors available. Monitor 1 settings refer to the DVI and the BNC 1 output. Monitor 2 refers to the spot monitor BNC 2. The Spot monitor of the GDV-B2208A and the GDV-A4416A can only display 1-channel views.

For the models GDV-C4416A and GDV-B8832A you can configure 4 monitors. Monitor 1 will configure the outputs DVI 1 and BNC 1. Monitor 2 configures the outputs DVI 2 and BNC 2. Monitor 3 & 4 will configure the spot monitor outputs BNC 3 & BNC 4. The Spot monitors of the GDV-C4416A and the GDV-B8832A can also display multi-channel views. This gives you an incredible versatile monitor setup. For example, you could use all 4 monitor outputs of the GDV-C4416A and display only 4 channels per screen.

Special information for GDV-B8832A:

The GDV-B8832A has a unique monitor setup. The monitors 1 and 3 will show the channels 1-16, the monitors 2 and 4 take care of the channels 17-32. You can only access Playback on either the channels 1-16 or the channels 17-32.

Status:

You can disable not used monitors on this monitor page. Then the [MON] button will not have an effect on the disabled monitors.

Event Pop-Up:

If the Event Pop-Up is set, the selected monitor will display only the channels on which an event occurred. For example, when on 3 channels a motion was detected, a 4 division screen will be displayed on the screen, including these 3 channels. Press any button to return to the original channel, or wait until the Event Pop-Up time ends.

The Event Pop-Up can be defined for each monitor separately.

Multi mode:

GDVB8832A, GDV-C4416A and GDV-A4416A have the following predefined screen modes: 4E (4 channels), 9B (basic 7 channels and additional 2 channels) and 10A (10 channels). For GDV-B2208A only the 4E (4 channels) multi-mode is available. The Sequence configuration can also be different for each monitor.

The way to composing:

To compose your customised Multi Mode select first the target window and then the channel you want to add.

Info Level (Display information):

In the Info Level you can configure which information will be shown in live view and in playback view. In live view, time, channel name, event, recording status, HDD, Remote control ID, text can be set and in playback view, time, command, channel name, event and text can be displayed.

Sequence configuration:

Here you can configure the user sequence. You can edit up to 16 steps within an interval from 1 to 60 seconds. You can select a single channel and Multi-Mode views.

Scan Mode:

When using a Composite signal for the monitor connection, you can choose between "Underscan" and "Overscan" mode. Depending on your monitor, the scene can be cut off on the edges. If so, please set Scan Mode to "Overscan" to see the full picture.

Resolution:

There are different resolutions available: 800 x 600, 1024 x 768, 1280 x 720, 1280 x 1024 and 1920 x 1080.

After you have changed the resolution, you will need to confirm the new settings in a pop up window. If you do not confirm (for example, if the resolution is not supported by your monitor), the settings will switch back to the previous ones.

Single Monitor Mode:

The GDV-B8832A also features a single monitor mode that will allow you to use the GDV-B8832A only with 1 monitor connected. If this mode is set to YES, the [MON] button of the front panel and the Monitor switching feature of the function bar will not change the active monitor, they will instead show the monitor 2 output on the DVI1 / BNC1. Then you will be able to see channels 17-32 on monitor 1.

8.3.3. Audio Setup

In this menu the user can configure Audio recording, Volume, Synchronisation and Mixing.

Audio Channel:

Select the channel you want to configure.

Audio Recording:

Enable or disable the audio recording. If disabled, audio will be transmitted in live view, but will not be recorded. If audio recording is enabled, the recorded audio will also be available in playback mode.

Synchronising Video Channels:

Configure which video channel is matched to a selected audio channel. This function is applied only to the recording. Audio out in live view will be set in the Voice Mixing option below. In the default setting the audio channel no.1 is matched to the video channel no.1.

Audio Gain:

Configure the volume of the audio in the + /- direction.

Audio Output Mix:

Select the audio output in live view. If set to "All", input audio can be monitored in all channels. If configured to a certain channel, the audio can only be heard when you monitor the selected channel.

8.3.4. Text Setup

Recording:

Enable or disable the recording of transmitted texts.

Sync Text with:

Select the channel which will be synchronised with the text input.

Device:

Select the type of the Text input device you are using. Choose between VSI-Pro Hydra, Starfinger 007 or manual configuration. If you choose the manual configuration you have to set the Header, Delimiter, Timeout and Lines settings.

Seek Header:

Activate or deactivate searching for the header of the data. You can define up to 2 different headers here. For information about the header, please refer to the manual of your text input device.

Delimiter:

The delimiter value may differ depending on the device used. For more information on delimiters, refer to the user manual of the text input device.

Timeout:

The lines defined below are the maximum number of text lines available for one piece of data. Even though the number of lines is preset the actual number may differ sometimes. For example, three lines are programmed for a client name input for an ATM, but if someone registers only his/her first name and last name, only two lines will be provided when the person uses the ATM. The DVR will not be able to detect this automatically, so the Timeout function will be used to stop data recognition after the last line is entered.

Lines:

This defines the maximum number of lines for one piece of data.

Caution: If the external text input device cannot be recognised, please contact the seller of the external device.

8.3.5. Serial Setup

The DVR has 3 serial ports. One is a RS-232 serial connection and the other 2 ports are serial RS-485 connections.

Serial Port:

Select which serial port you want to configure.

Device:

Select the connected device and the protocol that it is using.

Interface:

Configure which interface the device is using.

COM1 is RS-232C; COM2 and COM3 are RS-485.

Baud rate/Parity Bit/Stop Bit/Data Bit:

Input a suitable value depending on the external device.

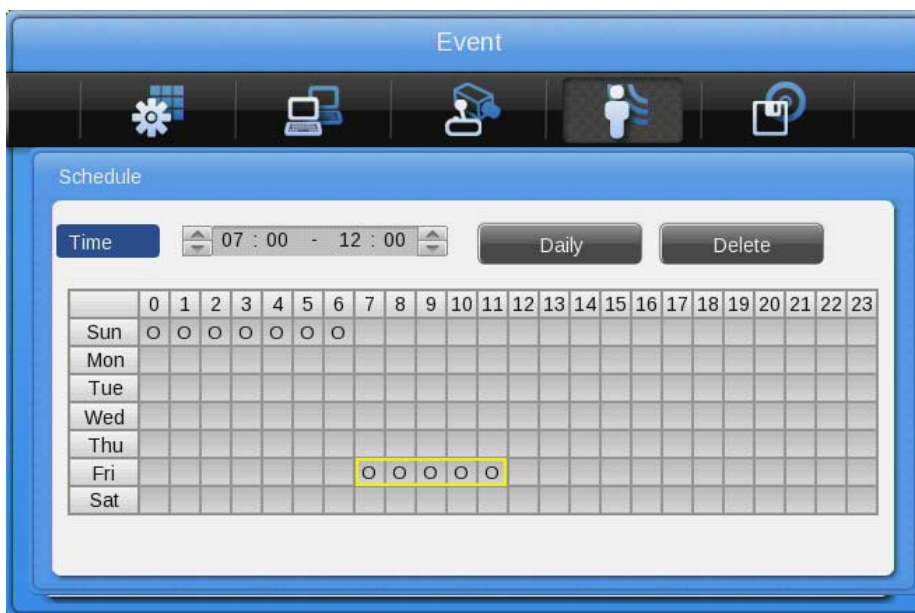

8.4. Event Setup

In this menu users can configure the handling of an event.

8.4.1. Event Check

Enable or disable the event checking algorithms. You can set up a schedule for the event check if you want to enable the event check only for a certain time frame. In the case of schedule mode, you can set up schedules for different dates and times, as shown in the following screenshot.

Create a schedule:

The user can start a schedule event by clicking with the mouse in the schedule field or using the front panel direction and [Enter] buttons to create schedule indexes. An active index (marked yellow) can be changed afterwards by changing the program type and the time.

You can also copy an index to all other days by clicking on the [Daily] button. This will copy the yellow marked index to the other days. Existing indexes on these days will not be deleted, but split.

To delete an index, select it by using the mouse or the direction keys and press the [Delete] button.

8.4.2. Event Actions

Configure what action the DVR will perform if an event is detected.

Event Action:

There are 7 different actions you can choose from: Relay 1 to 4, Buzzer, FTP, E-Mail and Twitter.

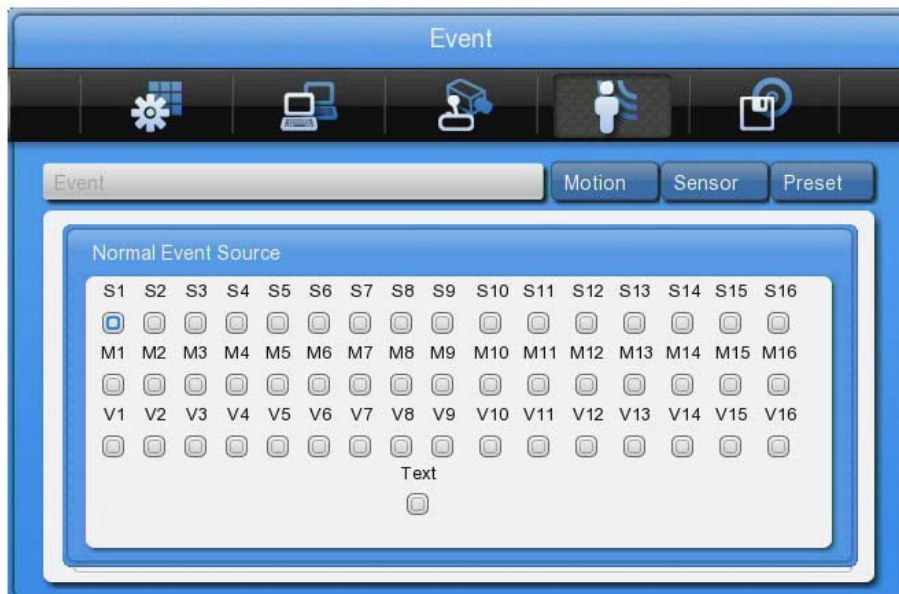

Action Duration:

Select how long an Action Duration will be kept up. Relay and Buzzer can be configured from 5 seconds to 60 seconds. In the FTP, E-mail and Twitter notification you can configure the repeating interval.

Normal Event Source:

The user can configure which event sources will be used for event actions. Depending on the model, the numbers of sources can differ. (S1-S16: Sensor; M1-M16: Motion Detection (channel); V1-V16: Video loss (channel); Text synchronisation)

Model	Sensor	MD	V-Loss	Text
GDV-B8832A	16	32	32	1
GDV-C4416A	16	16	16	1
GDV-A4416A	16	16	16	1
GDV-B2208A	8	8	8	1

System Event source:

In the system event source menu you can configure which system events are used for event action (Bad block, Disk full, Fan error, Authorisation failure, DDNS registration failure).

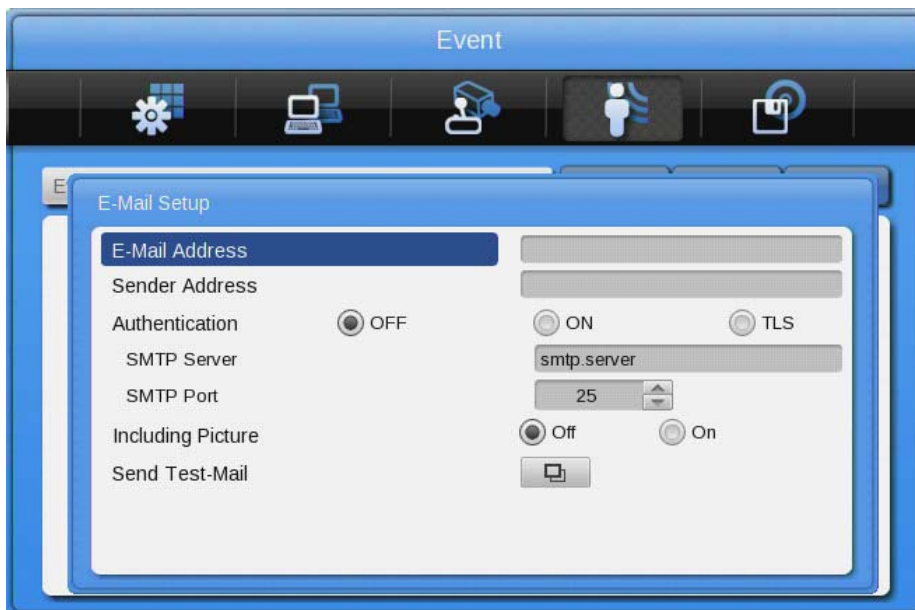

E-Mail Setup:

Here you can set up the sender & receiver E-mail address.

E-mail address:

Input the E-mail address to get an event alarm to this E-Mail address.

Sender Address:

Not mandatory, but necessary if the receiver wants to know which DVR sent the event.

Authentication:

Please select here if your SMTP Server needs an authentication. You can also choose if your SMTP Server is using a TLS encryption method.

SMTP Server: Enter your SMTP server address, provided by your email address provider.

User ID: Enter the username for your email address.

Password: Enter your email password.

SMTP Port: Enter the port your SMTP server is using. This information can also be obtained from your email provider.

Including Picture:

In a general event, when sensor, MD, video signal loss events are generated, the event information and channel information will be sent together with the E-mail. A system event just sends the system event information.

FTP Setup:

Here you can set up all information needed to upload events to an FTP server.

Server URL:

Input the URL to connect to the FTP server. Please use either a DNS name or the static IP address.

User ID:

Please input the user name which will be used to access the FTP server.

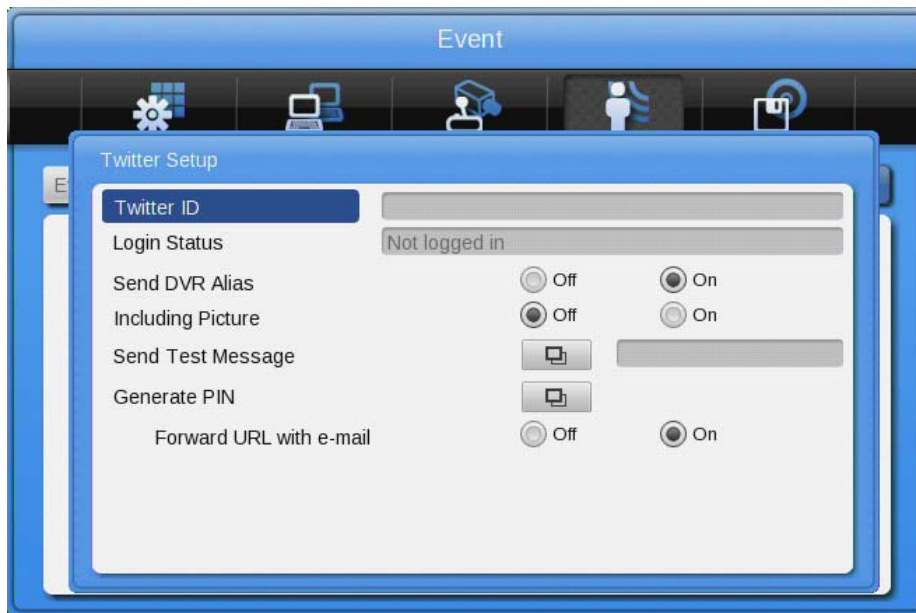

Password:

Please input the password of the above user.

FTP directory:

If you want to include all the uploads in a dedicated directory please name it here. Make sure the directory exists on the FTP server.

Twitter Setup:

1. Generate PIN

This will generate a link to the Twitter website, where you can allow the access of the DVR to your account.

NOTE: If you have a valid e-mail account already set up in your DVR, you can send this link directly to your e-mail address, which will make the setup easier. Otherwise you will need to write down the address by hand and put it manually in your web browser.

2. Open the Link in a Web browser.

3. Put in your access data in the web browser and allow the DVR to access your Twitter account.

4. Twitter will provide a PIN number that you can put into the according field in the DVR.

5. Now the connection should be established automatically.

NOTE: The DVR cannot change your privacy settings in your Twitter account. If you do not want to share the events with other people, make sure your Twitter account is set to private mode. Check the Twitter website for details on how to privatise your account.

8.4.3. Motion Detection

Channel:

Select if you want to configure all channels or only a dedicated one.

Sensitivity:

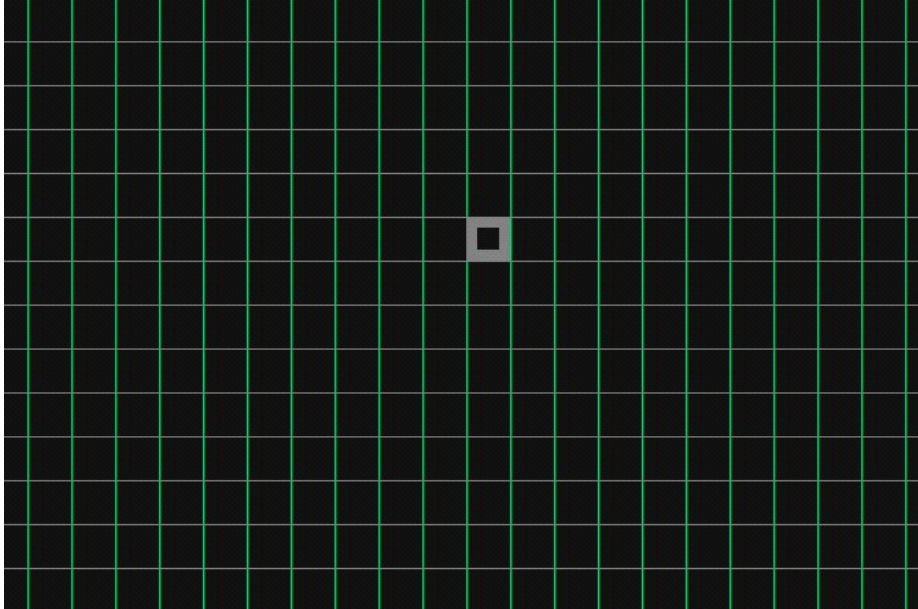

The sensitivity of the motion detection can be configured from min. 1 to max. 10, whereas 1 means less sensitive and 10 means very sensitive.

Area:

Select the detection area. The user can either select the whole area or can define a customised user area.

Custom Area:

A custom area can only be defined for a single channel. The video is divided into 22x15 grids. After pushing the custom area button, the configuration window for the detection area will appear.

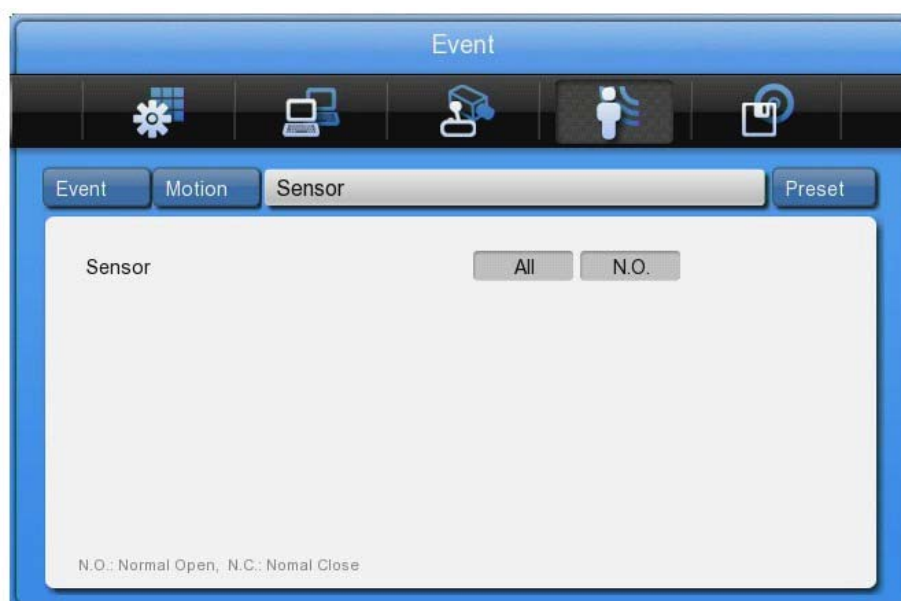

Select an area with the direction keys and press [Enter] or click the mouse to select or deselect an area which is used for motion detection. The first selected field will define the start and the second one will draw a rectangle within these 2 fields. Combine several rectangles to optimise the Motion detection area. Press the [ESC] button or click the right mouse button to apply your settings and go back to the previous menu.

8.4.4. Sensor

This menu is to set up the existing sensor input and the type of the sensor.

GDV-B8832A, GDV-C4416A and GDV-A4416A have 16 inputs and GDV-B2208A has 8 inputs.

The sensors can be set either to Normal Open (N.O.) or to Normal Close (N.C.).

8.4.5. Preset

Configure which preset is loaded for PTZ cameras when an event is detected. You can select between sensor events, motion detection and text synchronisation. You can configure up to 16 presets per camera. The preset position can be configured in the PTZ single channel view.

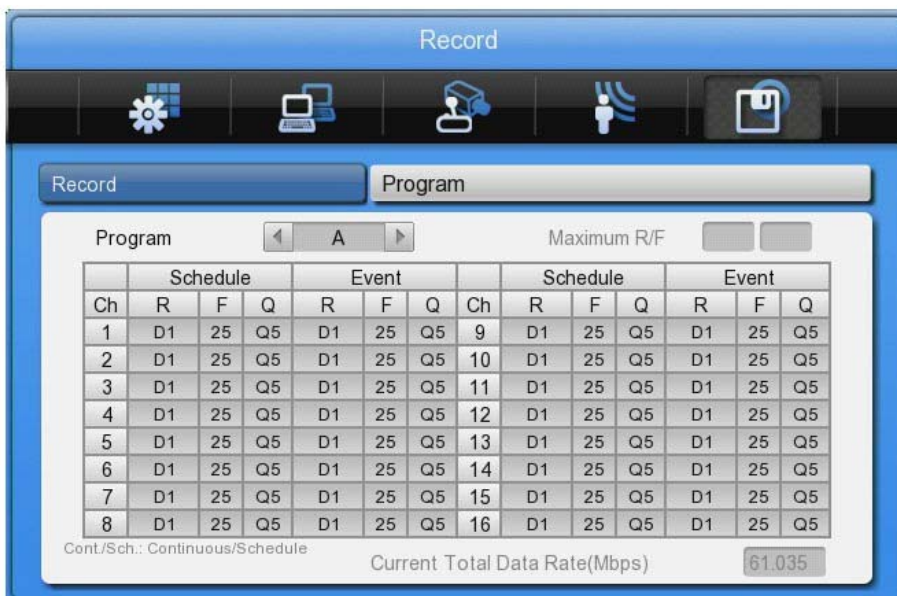

8.5. Recording Setup

There are 4 modes for recording – schedule recording, manual recording, event recording and continuous recording

Schedule Recording records according to a configured schedule. Manual Recording records only after pushing the [REC] button, continuous recording will record all the time and Event Recording records when events are detected.

8.5.1. Program Setup

Here you can setup the recording resolution, frame rate and quality for every channel for normal recording and for event recording.

Program:

There are 9 programs from A to I composing the recording quality and resolution per channel. For a detailed explanation please refer to the program configuration below.

CH (Channel):

Displays the channel number.

R (Resolution):

There are 3 resolutions: 4CIF (704x480), 2CIF (704x240) and CIF (352x240).

F (FPS):

FPS means frame per second. The user can select a frame rate from 1 to 25fps. The max. frame rate can differ according to the configuration.

Q (Quality):

There are 5 recording qualities: Q5 / Q4 / Q3 / Q2 / Q1. The recommended quality for event recording is Q3. Q1 has a low quality which needs less storage space and Q5 is a higher quality which needs more storage space.

Max R/F:

Max R/F shows the number of frames available according to the selected resolution. For instance, if it displays 25fps at CIF, it means that this channel can record up to 25 frames in CIF resolution.

How to calculate the recording performance:

$4\text{CIF}[704 \times 480] = 2 \times 2\text{CIF}[704 \times 240] = 4 \times \text{CIF}[352 \times 240]$

If 400 frames can be recorded in CIF resolution, instead of CIF you can record up to 200 frames in 2CIF resolution or 100 frames in 4CIF resolution.

NOTE: If you disable a channel or lower its resolution or its frame rate the unused bandwidth can be used for other channels to increase their frame rate or resolution.

The relation between general recording and event recording:

When an event is triggered, the DVR records with the event recording settings. The recording performance of the DVR differs for every model.

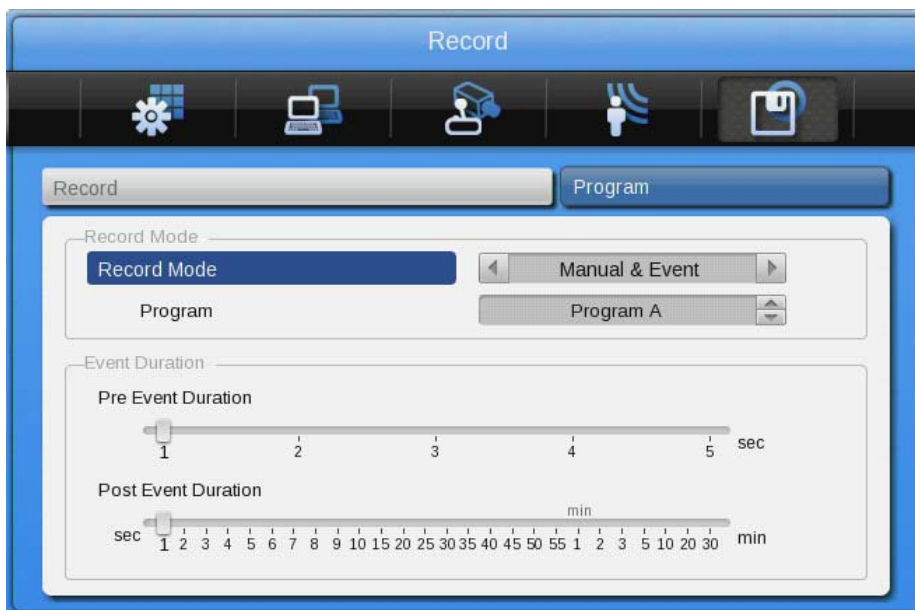

8.5.2. Manual / Continuous / Schedule Recording Setup

In the submenu "Record" you can select the recording behaviour. Select between Manual & Event, Schedule & Event recording or Continuous & Event recording.

Manual & Event Recording:

If set to Manual & Event, the DVR will record when pressing the [REC] button. It will stop recording when you press [REC] again.

You can also set which program is used for manual recordings.

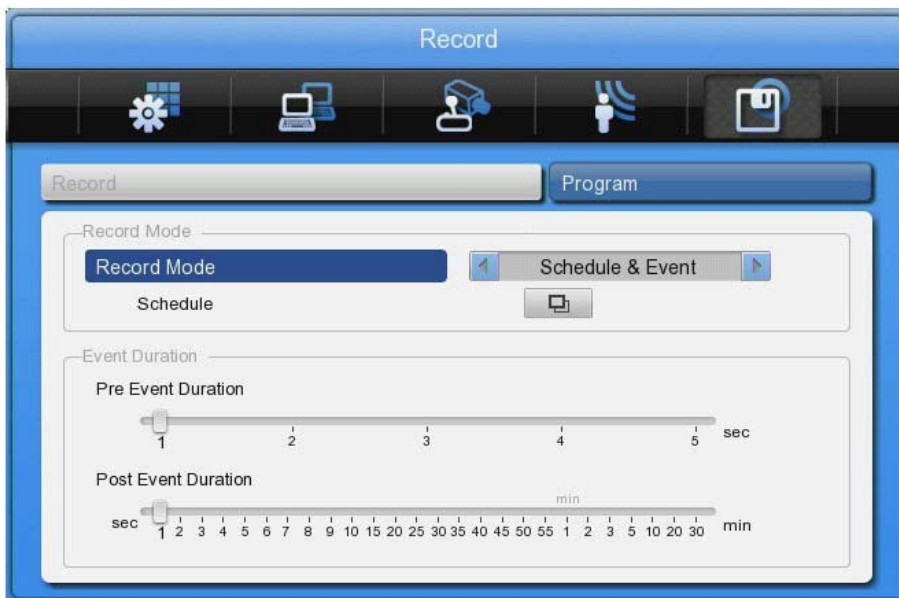

Continuous & Event Recording:

If the DVR is set to Continuous & Event the DVR will record all the time. If an event occurs the recording setting will be changed from continuous to event settings.

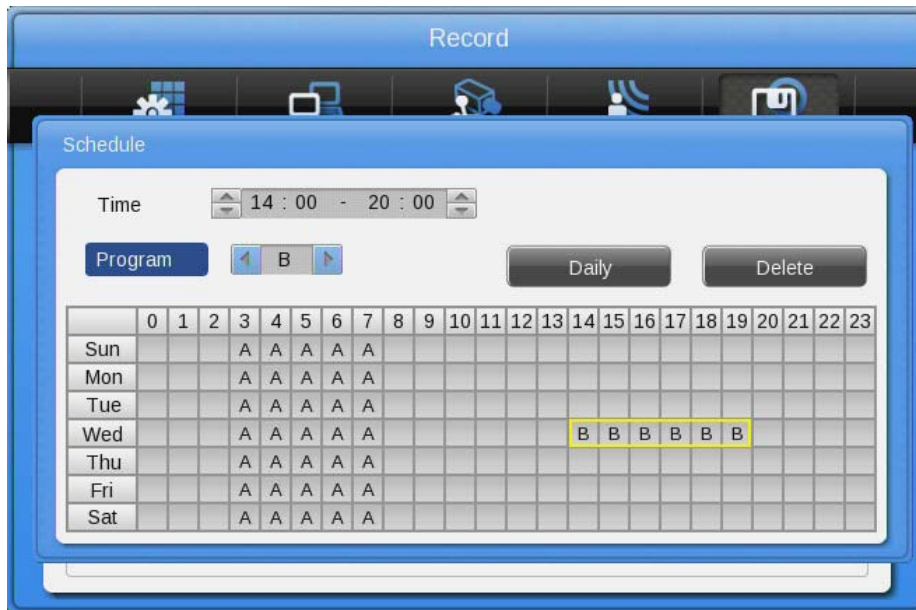

Schedule & Event Recording:

The DVR can record automatically, depending on the programmed schedule. Set the recording mode to Schedule & Event and configure the days and time in the schedule submenu.

Select the days and the time zones which you want to record. You can also select different programs for different times.

- Program: Set the recording program (A-Z)
- Time: Set the applicable time

Configuration:

Select the recording start time and end time in the table by clicking with the mouse or pressing the front panel buttons. The weekday and the program will be displayed in the calendar view. To generate a new program index, just press the mouse button or the [Enter] button one more time over an empty field.

You can copy an active (yellow marked) program index to all the other days of one week, by using the [Daily] button.

Deletion:

Select the program index you want to delete (yellow marked) and click the [Delete] button.

When clicking the delete button without any program index selected, the previously selected INDEX will be deleted first and after that, from the largest program index in order downwards to the smallest.

Editing:

Select a program index to edit and change the program and time directly. You can select it in the calendar by clicking with the mouse or pressing the front panel direction buttons.

9. GRUNDIG Web Viewer

The GRUNDIG WebViewer is a Web application program to access the DVR over an Ethernet or Internet connection. You can monitor the live view or access the recorded data with this program.

The GRUNDIG WebViewer is divided into the Login page, the Monitor page, where you can monitor the live video, and the Playback page to access recorded videos.

9.1. System Requirements

	Minimum	Recommendation
CPU	Intel Pentium 4 / 3.0GHz	Core2duo E6750 or higher
Main Memory	1GB	2GB or higher
Video Memory	128MB	512MB or higher
Display	1280 x 1024 (with 32bit colour) or higher	
HDD	1GB or higher	
OS	Windows XP Professional (over SP2) / Window Vista Business (over SP1)	
Others	DirectX 9.0 or higher	

9.2. Login

After inputting the IP address of the DVR, the GRUNDIG WebViewer Login page will be displayed in the browser window.

Input the User ID and Password and click 'LOGIN' to access.

If the user/administrator did not change the password in the Control Center, the ID and the Password will be:

ID: admin / user1 / user2 / ... / user10

Password: 1234 / 1111 / 2222 / ... / 0000

9.3. User Setup

To access the GRUNDIG WebViewer, user authority and password can be changed in the DVR or in the Control Center configuration (see the following images).

The basic admin password is "1234" and the user password is "1111" for User 1, "2222" for User 2 etc. The password for User 10 is "0000". A valid password can have up to 8 digits.

This authority configuration is almost the same in the DVR as in the Control Center. But the authorisation of quick recording and the covering of dedicated channels for a user are only possible in the Control Center.

9.4. Available Browser

The GRUNDIG WebViewer is optimised for the Windows Internet Explorer 6.0 or higher. But GRUNDIG also supplies a Java based access to the DVR that can be used with other browsers like Mozilla Firefox, Apple Safari, Google Chrome or the Opera browser.

WebViewer Installer:

The Login page provides a manual installation program for the WebViewer.

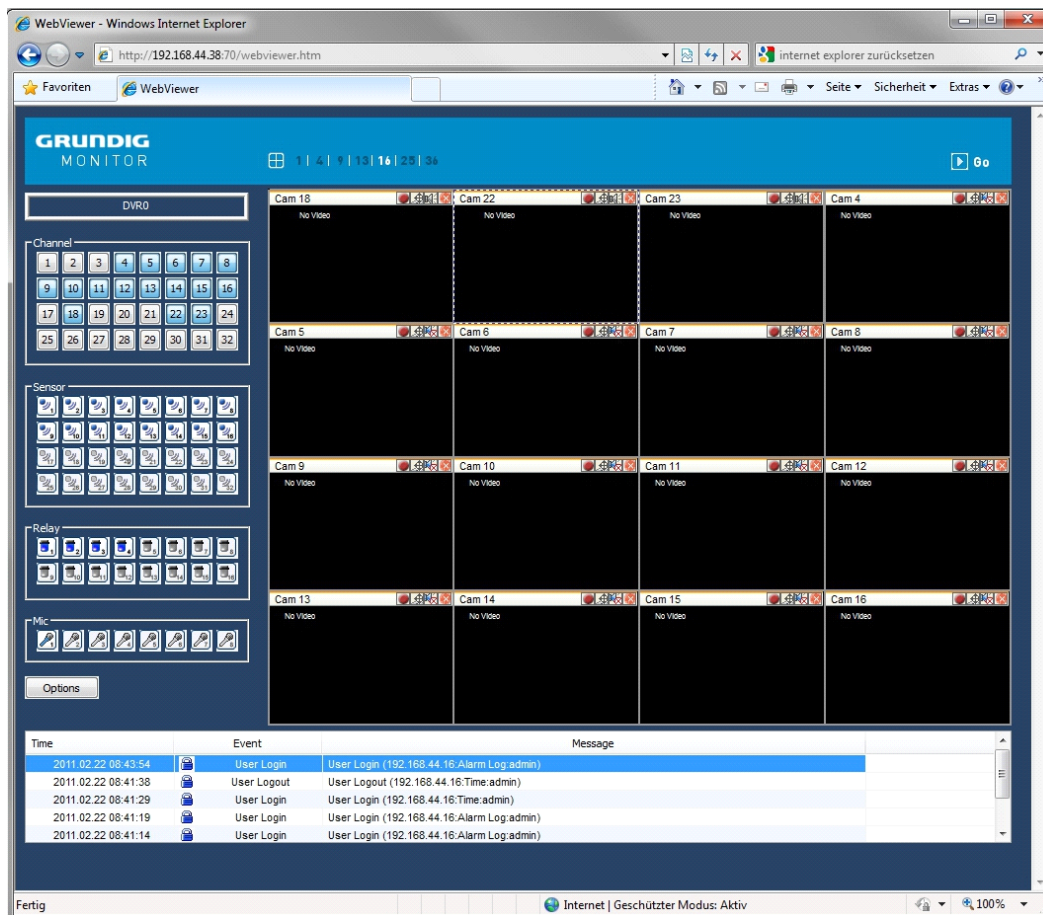

A PC that accesses the WebViewer for the first time will install an ActiveX certificate to use the WebViewer's functions. If this installation fails, the installation program can be downloaded from the Login Page and installed manually.

Caution:

When installing the WebViewer Installer, all programs related to the Control Center have to be closed. Otherwise the installation might fail.

9.5. Monitor

When successfully authorised with User ID & Password input at the Login page, you will be directed to the Monitor page. On the Monitor page you can view live videos of cameras connected to DVR, or you can control a PTZ camera, Relays, and use the Microphone function according to user's authorisation.

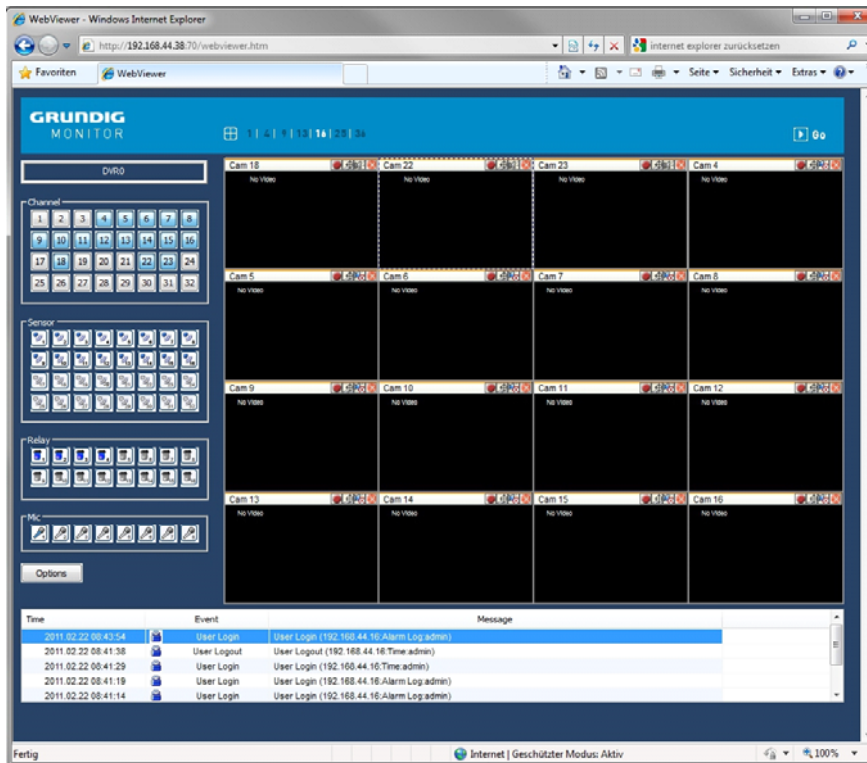

9.5.1. Screen division and changing video position

When accessing the Monitor page for the first time, 9 divisions, 16 divisions or 32 divisions (according to the number of channels of the DVR) are displayed.

You can change to 1, 4, 9, 13, 16, 25 or 36 divisions by clicking on the number on top of the page. Also, you can change to 1-channel mode by clicking on any of the channel images.

Double-click on one of the channels to switch to 1-channel mode.

After entering 1-channel mode, a double-click on the screen will return to the previous division of channels.

On the division screen, you can change the screen location.

If you want to move channel 3 to the position of channel 6, drag the 3ch image and drop it on the 6ch location. Channel 6 will automatically move to the former position of channel 3.

9.5.2. Playback on Standard monitor (16 / 9 / 4 division)

Move to the playback function by clicking on the image above.

9.5.3. Channel On/Off

You can select which channels are played by clicking the On/Off button of the Channel located on the left hand side of the page.

9.5.4. Sensor Indication

The icons indicate whether a sensor event occurred in the system.

When a sensor is activated, the relevant sensor icon will change to red colour.

9.5.5. Relay operation

You can turn on or off the relays of the DVR within the WebViewer. Click the number button to activate the relay and the icon will change from blue to orange.

If you define a time for the relay in the Control Center, the Control Center will be turned off automatically after this configuration.

Activating relays is only possible when the user possesses the authorisation. Refer to the chapter "User Authority" in this manual for the setup of user authority for relays.

9.5.6. Using a microphone

You can enable or disable the use of a microphone within the GRUNDIG WebViewer. The default setting is Off. If a microphone is activated, the colour of the corresponding icon will change from blue to red.

9.5.7. Event Data

The event log is displayed at the bottom of the monitoring page and shows all the event information stored on the DVR.

2009.03.31 10:42:13		7 On	CH7 - Motion Detected
2009.03.31 10:42:13		6 On	CH6 - Motion Detected
2009.03.31 10:42:13		5 On	CH5 - Motion Detected
2009.03.31 10:42:13		1 On	CH1 - Motion Detected
2009.03.31 10:42:13		16 On	CH16 - Motion Detected

9.5.8. Relay operation

The indicated data is listed as follows:

[Table / Event Icon]

Button	Function
	Motion Detection On
	Sensor Input (Off, On)
	Relay Output (Off, On)
	No Video, Video Detected

9.5.9. Video Recording & Safe Saving

Video Recording:

During monitoring, the GRUNDIG WebViewer can record up to 10 minutes of video by clicking the Quick Recording button (the red dot in the top panel). During Quick Recording, the recording time is shown on the video.

During video recording, click the Quick Recording button to stop recording and a dialogue box will be opened to store the recorded files.

Saved recording files are saved in "*.re4" file format. The .re4 file can be played back by the GRUNDIG Control Center Playback software or the GRUNDIG Mini Player software.

Screenshots:

You can make a screenshot of the video by clicking on the right mouse button in the selected channel and by choosing the "Save As" option. The picture can be stored in .jpg, .bmo or .eye file format.

9.5.10. Using PTZ

Among the icons on the top of a video in monitoring mode, click 'PTZ' to activate the control Pan, Tilt, Zoom, and Focus. If a PTZ camera is connected and already set to PTZ, this button is activated by default.

Pan/Tilt Control:

To control the PTZ with the mouse, click the right button and select "PTZ" or click the arrow button at the top. A Cross line on the middle of screen will be shown indicating that PTZ control is activated. Click within the image to operate the pan/tilt function.

Zoom/Focus Control:

Move the mouse to the left and right edge to see the slide bar for Zoom and Focus.

Move to Preset:

In case you have a set preset for a PTZ in the DVR, you can access it by right-clicking the mouse and selecting "Go to Preset". When selecting a preset position from the preset list, the camera will move to the selected preset position.

Activating Auxiliary:

In case of a preset set, the "Auxiliary" function is indicated additionally, and can be operated after you selected the designated menu.

NOTE:

For a supported PTZ camera list please refer to 6.9. PTZ Control.

9.5.11. Using Audio

In case of Channel setup synchronisation with Audio, press the right mouse button on the channel to activate the pop-up menu "Listen" or activate the audio listen button. In the default setting the audio is muted. To activate the audio transmission, select it in the pop-up menu or click the corresponding button.

9.5.12. Closing Video Channel

You can disable and enable channels by clicking on the corresponding button at the top of the screen.

9.6. Playback

If you have the user rights to play back video, you can access the Playback screen when pressing the “Go” button on the Monitor screen of the GRUNDIG WebViewer.

In the Playback screen you can monitor up to 16 video streams simultaneously and search through a calendar to see recorded video from that date. You can make backups of the videos and save images in .bmp format or print them directly.

9.6.1. Video Division & Changing Channel

The Playback supports 1, 4, 9 and 16 divisional screens. You can select the number of divisions using the menu on the top of the page as shown in the picture above.

If the screen shows 4 divisions CH1~CH4, you can change to CH5~CH8 using the 'Next' button. Press the 'Prev' button to call for the previous channel group CH1~CH4.

The analogue 32ch DVR can call the channels 17-32 using the group moving button as follows:

9.6.2. Image recording

You can save a playback image as '.bmp' picture file.
Select the channel with the mouse and click the 'Save' button.

A Save Image dialogue box appears and you can input a memo text or select if the channel name, date and event data should be written unto the file.

Press 'OK' to open the dialogue box for the saving location, then you can save it as a '.bmp' file.

9.6.3. Printing

Select the channel you want to print, and click the 'Print' button.

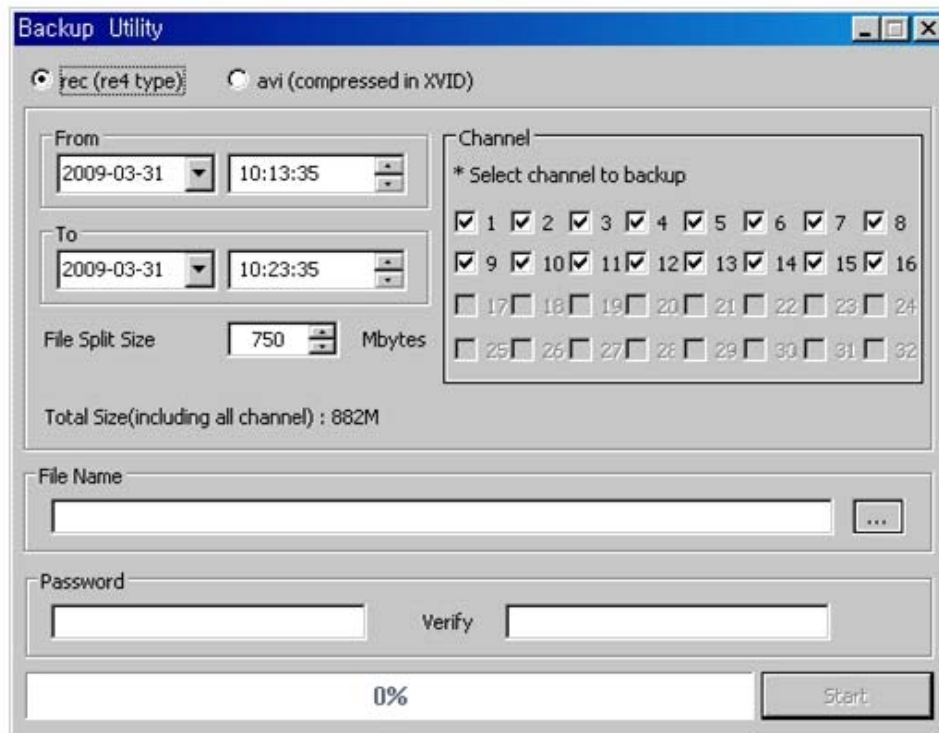

A window pops up to input a memo text. Click the 'OK' button to print the image on the connected printer. The Printout will include the 'Printing Date', 'Channel name', 'Recording Date', 'Event' and the 'Memo' text.

9.6.4. Backup

You can choose between .re4 (multi-channel) or .avi (single-channel) backup. Select the time, date and channel you want to back up and choose a location to save the file to.

If you want to secure the video file you can input a password which has to be verified.

9.6.5. Web Monitor

Click on the 'Go' button at the top of the page to return to the Web Monitor page.

9.6.6. Channel On/Off

This function is similar to the Channel On/Off function of the Web Monitor.

9.6.7. Saving Time & Checking Rec. Capacity

This field indicates the total capacity of the HDD and also displays the Starting date & Last date of the recorded video on the DVR. The image shows the percentage (%) of the DVR's HDD capacity.

9.6.8. Searching in the Calendar

When a video was recorded on a special date, that day will be coloured in black. When a day is coloured in grey, this means that there was no video recorded on this date. Select the year, month, day and time to play back the video of that date.

When clicking on the 'Go to' button, you get access to the 24 hours of that date.

9.6.9. Functions at the bottom of monitor

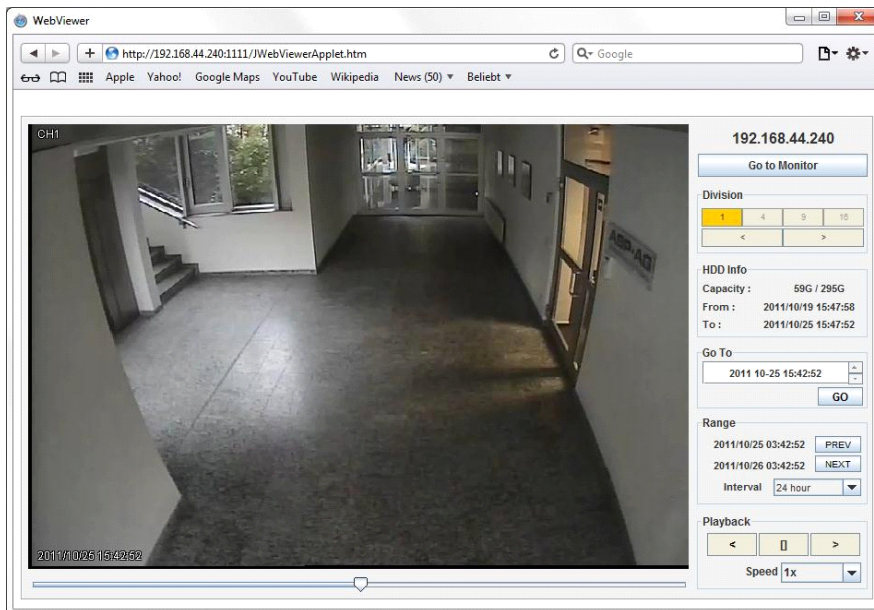

- (1) Indicates the playback range of the recorded image.
- (2) Press the -> <- buttons to jump to the time area of an earlier or later time.
- (3) From left to right: 'One frame back', 'Play backward', 'Stop', 'Play', 'One frame forward'.
- (4) Here you can set the playback speed. After clicking the button, it can set the playback speed to '0.5x, 1x, 2x, 4x, 16x, 32x, 64x, and All'.
- (5) Here you can set the time area. After clicking the button, select the time area out of '10min, 30min, 1hour, 3hour, 6hour, 12hour, 24hour'.
- (6) Here you can select if you want to use DirectX or not. If checking/activating DirectX mode, the WebViewer will use the graphic card of the PC to display the video. This will reduce the CPU workload.
- (7) Here you can set if audio should be played or not, and you can change the volume.

9.7. Java based Web Viewer

The GRUNDIG DVRs also support a connection based on Java. This technology can be used to get access to the DVR using another browser than the Microsoft Internet Explorer. The user just needs to select "Java" in the WebViewer start page.

While the optical design looks slightly different than ActiveX, the basic functions are almost identical. You can have Multi-Views in Live mode, control PTZ cameras and activate the relays over a network connection.

You can also access the Playback of the DVR, and check recorded data. At the moment it is not possible to backup data.

10. GRUNDIG Live Mobile Viewer

The GRUNDIG Mobile viewer is a viewer service for monitoring video with many different mobile devices. To access the mobile viewer, the user needs a mobile device supporting Wi-Fi or 3G.

10.1. Log-In Page

The picture below shows the Mobile viewer log-in page.

To access the log-in page via mobile viewer, please type in the address in the following format:
`http://IP/mvmenu.html`.

E.g.: `http://192.168.44.40/mvmenu.html`

or: `http://g0187D3A.grundig-ddns/mvmenu.html`

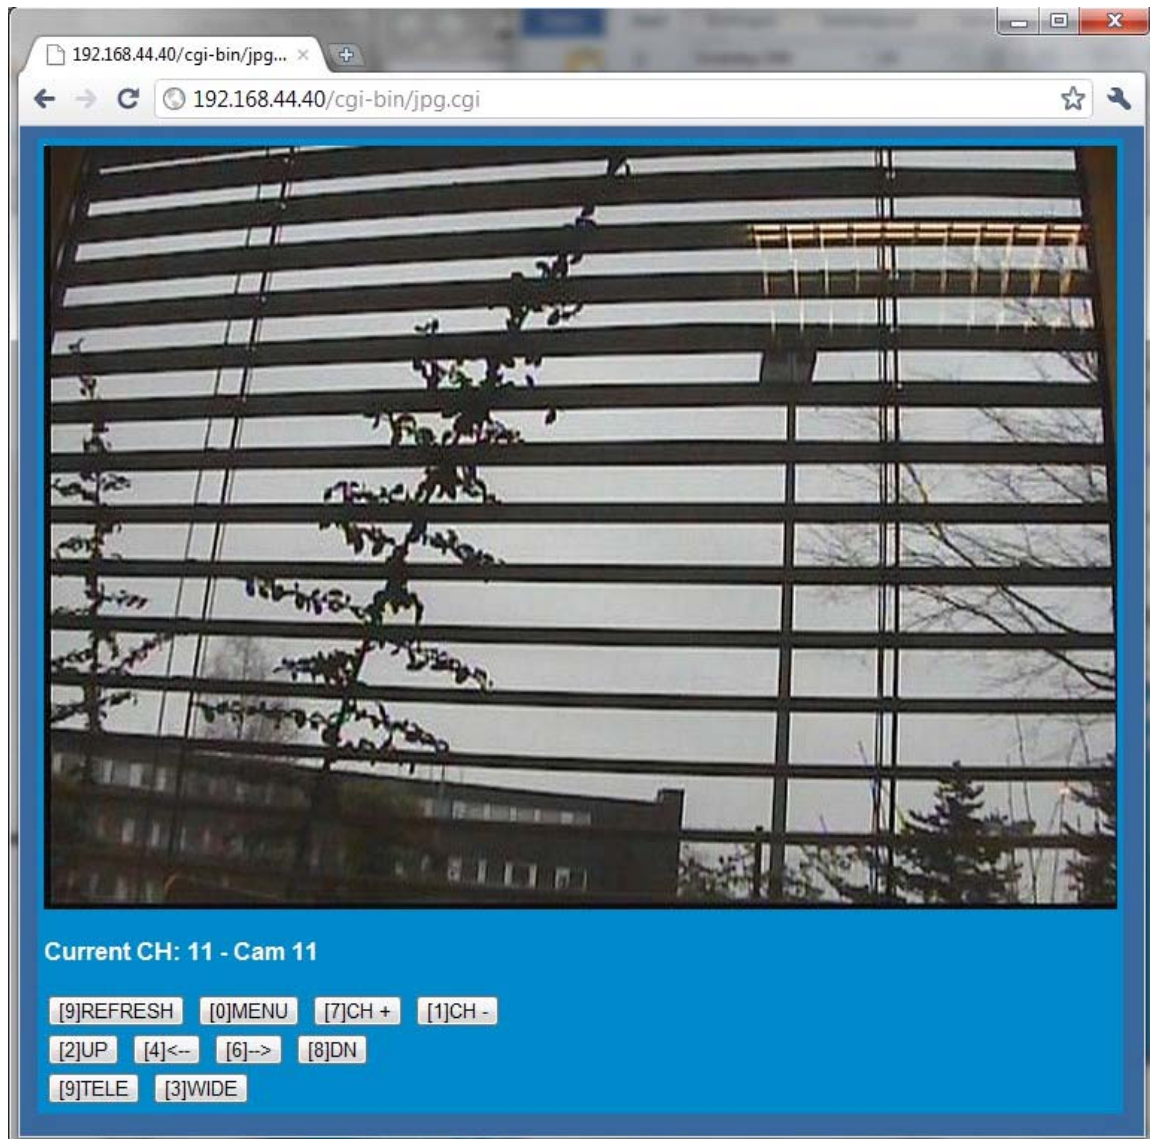

To log-in, please enter the ID and the password, select the resolution, the channel number and the refresh rate. Press the [Start View] button or [0] on a mobile phone without a touch screen to start the monitoring.

10.2. Monitoring Page

The monitoring page shows the selected channel video and some functions you can use, right below the video display. The functions can be activated by pressing the buttons (touchscreen devices) or pressing the corresponding number on your phone keypad.

For the functions, please refer to the description below.

- [0] MENU : Move back to Login page
- [1] CH- : Move to previous channel
- [2] UP : If the channel is PTZ you can move the camera up
- [3] WIDE : If the channel is PTZ you can zoom out
- [4] <- : If the channel is PTZ you can move the camera to the left
- [6] -> : If the channel is PTZ you can move the camera to the right
- [7] CH+ : Move to next channel
- [8] DN : If the channel is PTZ you can move the camera down
- [9] TELE : If the channel is PTZ you can zoom in

Specifications GDV-B2208A

Operating System	Embedded OS
Video Inputs	8 CH Composite, BNC, Looped
Video Outputs	2 CVBS (1 Main, 1 Spot), 1 DVI (HDMI/VGA compatible)
Basic Internal Storage	1 TB
Storage Max. Expansion	6 TB (2x2TB SATA and 1x2TB eSATA)
Video Compression	H.264, JPEG
Recording Resolution	Full D1 (704x576), Half D1 (704x288), CIF (352x288)
Recording Speed	200fps (352x288), 200fps (704x288), 100fps (704x576)
Recording Mode	Continuous, Event Alarm, Motion, Video Loss, Schedule, Manual
Display Resolution	max. 1920 x 1080
Display Speed	200 fps
Auto Switching	0, 3, 5, 10, 20, 30 sec, Event or manual, Multi Channel Views
Internal Backup	Built in DVD-RW drive
External Backup	USB HDD, USB Memory, DVD-R, Network, eSATA
Search Mode	Date/Time, Event Alarm, Motion, Video Loss
Motion Detection	On/ Off/ Area Setting
Event Source	Motion, Alarm, Text, Video Loss, System
Event Action	Pop-Up, Relay, E-Mail, FTP, Network, Buzzer, PTZ Preset
Audio Inputs	4 CH, RCA
Audio Outputs	1 CH, RCA
Alarm Inputs	8 contact input N/O or N/C
Alarm Outputs	2 Relay
Interfaces	2 port RS-485, 1 port RS-232, System Keyboard, 1 Ethernet and 2 USB 2.0 ports
ATM/POS	Supports up to 16 ATM/POS with VSI-Pro Hydra Modules
Time Setting	Setting by NTP Server local or internet
Video Streaming	Versatile Triple Streaming (Dual H.264 + single JPEG)
Multiplex Function	Pentaplex
Network	Ethernet, 10/100 Base-T, ADSL Static IP, ADSL Dynamic IP(PPPoE), Cable Network (Dynamic IP)
Client software	Windows (XP, Vista, 7), Web Viewer: IE, Firefox, Safari, Chrome; Mobile: iPhone (OS4), Blackberry, Android, Windows Mobile, Symbian
Operating Temperature	5°C ~ +40°C
Humidity	less than 90%
Supply Voltage	110 ~ 240 VAC/50Hz
Power Consumption	75 W
Weight	8.2 kg
Dimensions (wxhxd)	445 x 88 x 418 mm

Specifications GDV-A4416A

Same data as the product above but:

Video Inputs	16 CH Composite, BNC, Looped
Recording Speed	400fps (352x288), 200fps (704x288), 100fps (704x576)
Display Speed	400 fps
Alarm Inputs	16 contact input N/O or N/C
Alarm Outputs	2 Relay
Operating Temperature	5°C ~ +40°C
Humidity	less than 90%
Power Consumption	75 W
Weight	8.2 kg
Dimensions (wxhxd)	445 x 88 x 418 mm

Specifications GDV-C4416A

Same data as the product above but:

Video Outputs	4 CVBS (4 Main) incl. 2 DVI (HDMI/VGA compatible)
RAID	Normal, RAID 1
Recording Speed	400fps (352x288), 400fps (704x288), 400fps (704x576)
Alarm Inputs	16 contact input N/O or N/C
Alarm Outputs	4 Relay
Operating Temperature	5°C ~ +40°C
Humidity	less than 90%
Power Consumption	75 W
Weight	8.9 kg
Dimensions (wxhxd)	445 x 88 x 418 mm

Specifications GDV-B8832A

Same data as the product above but:

Video Inputs	32 CH Composite, BNC
RAID	Normal, RAID 1
Recording Speed	800fps (352x288), 800fps (704x288), 400fps (704x576)
Display Speed	800 fps
Operating Temperature	5°C ~ +40°C
Humidity	less than 90%
Power Consumption	85 W
Weight	8.9 kg

GNU GENERAL PUBLIC LICENSE

Version 2, June 1991

Copyright (C) 1989, 1991 Free Software Foundation, Inc.
51 Franklin Street, Fifth Floor, Boston, MA 02110-1301, USA

Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public License is intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users. This General Public License applies to most of the Free Software Foundation's software and to any other program whose authors commit to using it. (Some other Free Software Foundation software is covered by the GNU Lesser General Public License instead.) You can apply it to your programs, too.

When we speak of free software, we are referring to freedom, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs; and that you know you can do these things.

To protect your rights, we need to make restrictions that forbid anyone to deny you these rights or to ask you to surrender the rights. These restrictions translate to certain responsibilities for you if you distribute copies of the software, or if you modify it.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must give the recipients all the rights that you have. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

We protect your rights with two steps: (1) copyright the software, and (2) offer you this license which gives you legal permission to copy, distribute and/or modify the software.

Also, for each author's protection and ours, we want to make certain that everyone understands that there is no warranty for this free software. If the software is modified by someone else and passed on, we want its recipients to know that what they have is not the original, so that any problems introduced by others will not reflect on the original authors' reputations.

Finally, any free program is threatened constantly by software patents. We wish to avoid the danger that redistributors of a free program will individually obtain patent licenses, in effect making the program proprietary. To prevent this, we have made it clear that any patent must be licensed for everyone's free use or not licensed at all.

The precise terms and conditions for copying, distribution and modification follow.

TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License applies to any program or other work which contains a notice

BSD License : ash, minipnp, telnet-server, YUI Library, ppp
Freetype License : freetype2

Portions of this software included in this product are copyright (C) 2010 The FreeType Project (www.freetype.org). All rights reserved.
IJG License : JPEG

The software included in this product is based in part on the work of the Independent JPEG Group.

MIT License : c-ares, curl, liboauth, jcode

OpenSSL License : OpenSSL

SIL Open Font License : Arimo

Copyright (c) 2010 Google Corporation.

This Font Software is licensed under the SIL Open Font License, Version 1.1.

This license is copied in this manual, and is also available with a FAQ at: <http://scripts.sil.org/OFL>

placed by the copyright holder saying it may be distributed under the terms of this General Public License. The "Program", below, refers to any such program or work, and a "work based on the Program" means either the Program or any derivative work under copyright law: that is to say, a work containing the Program or a portion of it, either verbatim or with modifications and/or translated into another language. (Hereinafter, translation is included without limitation in the term "modification".) Each licensee is addressed as "you".

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running the Program is not restricted, and the output from the Program is covered only if its contents constitute a work based on the Program (independent of having been made by running the Program). Whether that is true depends on what the Program does.

1. You may copy and distribute verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and give any other recipients of the Program a copy of this License along with the Program.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Program or any portion of it, thus forming a work based on the Program, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

a) You must cause the modified files to carry prominent notices stating that you changed the files and the date of any change.

b) You must cause any work that you distribute or publish, that in whole or in part contains or is derived from the Program or any part thereof, to be licensed as a whole at no charge to all third parties under the terms of this License.

c) If the modified program normally reads commands interactively when run, you must cause it, when started running for such interactive use in the most ordinary way, to print or display an announcement including an appropriate copyright notice and a notice that there is no warranty (or else, saying that you provide a warranty) and that users may redistribute the program under these conditions, and telling the user how to view a copy of this License. [Exception: if the Program itself is interactive but does not normally print such an announcement, your work based on the Program is not required to print an announcement.]

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Program, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Program, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Program.

In addition, mere aggregation of another work not based on the Program with the Program (or with a work based on the Program) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may copy and distribute the Program (or a work based on it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you also do one of the following:

a) Accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

b) Accompany it with a written offer, valid for at least three years, to give any third party, for a charge no more than your cost of physically performing source distribution, a complete machine-readable copy of the corresponding source code, to be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

c) Accompany it with the information you received as to the offer to distribute corresponding source code. (This alternative is allowed only for noncommercial distribution and only if you received the program in object code or executable form with such an offer, in accord with Subsection b above.)

The source code for a work means the preferred form of the work for making modifications to it. For an executable work, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the executable. However, as a special exception, the source code distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

If distribution of executable or object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place counts as distribution of the source code, even though third parties are not compelled to copy the source along with the object code.

4. You may not copy, modify, sublicense, or distribute the Program except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense or distribute the Program is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

5. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Program or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Program (or any work based on the Program), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Program or works based on it.

6. Each time you redistribute the Program (or any work based on the Program), the recipient automatically receives a license from the original licensor to copy, distribute or modify the Program subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties to this License.

7. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Program at all. For example, if a patent license would not permit royalty-free redistribution of the Program by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Program.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system, which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the

author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

8. If the distribution and/or use of the Program is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Program under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

9. The Free Software Foundation may publish revised and/or new versions of the General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of this License, you may choose any version ever published by the Free Software Foundation.

10. If you wish to incorporate parts of the Program into other free programs whose distribution conditions are different, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

NO WARRANTY

11. BECAUSE THE PROGRAM IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

12. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest possible use to the public, the best way to achieve this is to make it free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

one line to give the program's name and an idea of what it does.
Copyright (C) yyyy name of author

This program is free software; you can redistribute it and/or modify it under the terms of the GNU General Public License as published by the Free Software Foundation; either version 2 of the License, or (at your option) any later version.

This program is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU General Public License for more details.

You should have received a copy of the GNU General Public License along with this program; if not, write to the Free Software

Foundation, Inc., 51 Franklin Street, Fifth Floor, Boston, MA 02110-1301, USA.

Also add information on how to contact you by electronic and paper mail.

If the program is interactive, make it output a short notice like this when it starts in an interactive mode:

```
Gnomovision version 69, Copyright (C) year name of author
Gnomovision comes with ABSOLUTELY NO WARRANTY; for details
type `show w`. This is free software, and you are welcome
to redistribute it under certain conditions; type `show c`
for details.
```

The hypothetical commands `show w` and `show c` should show the appropriate parts of the General Public License. Of course, the commands you use may be called something other than `show w` and `show c`; they could even be mouse-clicks or menu items--whatever suits your program.

You should also get your employer (if you work as a programmer) or your school, if any, to sign a "copyright disclaimer" for the program, if necessary. Here is a sample; alter the names:

```
Yoyodyne, Inc., hereby disclaims all copyright
interest in the program `Gnomovision'
(which makes passes at compilers) written
by James Hacker.
```

signature of Ty Coon, 1 April 1989
Ty Coon, President of Vice

This General Public License does not permit incorporating your program into proprietary programs. If your program is a subroutine library, you may consider it more useful to permit linking proprietary applications with the library. If this is what you want to do, use the [GNU Lesser General Public License](#) instead of this License.

GNU GENERAL PUBLIC LICENSE

Version 3, 29 June 2007

Copyright © 2007 Free Software Foundation, Inc. <<http://fsf.org/>>

Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

Preamble

The GNU General Public License is a free, copyleft license for software and other kinds of works.

The licenses for most software and other practical works are designed to take away your freedom to share and change the works. By contrast, the GNU General Public License is intended to guarantee your freedom to share and change all versions of a program--to make sure it remains free software for all its users. We, the Free Software Foundation, use the GNU General Public License for most of our software; it applies also to any other work released this way by its authors. You can apply it to your programs, too.

When we speak of free software, we are referring to freedom, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for them if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs, and that you know you can do these things.

To protect your rights, we need to prevent others from denying you these rights or asking you to surrender the rights. Therefore, you have certain responsibilities if you distribute copies of the software, or if you modify it: responsibilities to respect the freedom of others.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must pass on to the recipients the same freedoms that you received. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

Developers that use the GNU GPL protect your rights with two steps: (1) assert copyright on the software, and (2) offer you this License giving you legal permission to copy, distribute and/or modify it.

For the developers' and authors' protection, the GPL clearly explains that there is no warranty for this free software. For both users' and authors' sake, the GPL requires that modified versions be marked as changed, so that their problems will not be attributed erroneously to authors of previous versions.

Some devices are designed to deny users access to install or run modified versions of the software inside them, although the manufacturer can do so. This is fundamentally incompatible with the aim of protecting users' freedom to change the software. The systematic pattern of such abuse occurs in the area of products for individuals to use, which is precisely where it is most unacceptable. Therefore, we have designed this version of the GPL to prohibit the practice for those products. If such problems arise substantially in other domains, we stand ready to extend this provision to those domains in future versions of the GPL, as needed to protect the freedom of users.

Finally, every program is threatened constantly by software patents. States should not allow patents to restrict development and use of software on general-purpose computers, but in those that do, we wish to avoid the special danger that patents applied to a free program could make it effectively proprietary. To prevent this, the GPL assures that patents cannot be used to render the program non-free.

The precise terms and conditions for copying, distribution and modification follow.

TERMS AND CONDITIONS

0. Definitions.

"This License" refers to version 3 of the GNU General Public License.

"Copyright" also means copyright-like laws that apply to other kinds of works, such as semiconductor masks.

"The Program" refers to any copyrightable work licensed under this License. Each licensee is addressed as "you". "Licensees" and "recipients" may be individuals or organizations.

To "modify" a work means to copy from or adapt all or part of the work in a fashion requiring copyright permission, other than the making of an exact copy. The resulting work is called a "modified version" of the earlier work or a work "based on" the earlier work.

A "covered work" means either the unmodified Program or a work based on the Program.

To "propagate" a work means to do anything with it that, without permission, would make you directly or secondarily liable for infringement under applicable copyright law, except executing it on a computer or modifying a private copy. Propagation includes copying, distribution (with or without modification), making available to the public, and in some countries other activities as well.

To "convey" a work means any kind of propagation that enables other parties to make or receive copies. Mere interaction with a user through a computer network, with no transfer of a copy, is not conveying.

An interactive user interface displays "Appropriate Legal Notices" to the extent that it includes a convenient and prominently visible feature that (1) displays an appropriate copyright notice, and (2) tells the user that there is no warranty for the work (except to the extent that warranties are provided), that licensees may convey the work under this License, and how to view a copy of this License. If the interface presents a list of user commands or options, such as a menu, a prominent item in the list meets this criterion.

1. Source Code.

The "source code" for a work means the preferred form of the work for making modifications to it. "Object code" means any non-source form of a work.

A "Standard Interface" means an interface that either is an official standard defined by a recognized standards body, or, in the case of interfaces specified for a particular programming language, one that is widely used among developers working in that language.

The "System Libraries" of an executable work include anything, other than the work as a whole, that (a) is included in the normal form of packaging a Major Component, but which is not part of that Major Component, and (b) serves only to enable use of the work with that Major Component, or to implement a Standard Interface for which an implementation is available to the public in source code form. A "Major Component", in this context, means a major essential component (kernel, window system, and so on) of the specific operating system (if any) on

which the executable work runs, or a compiler used to produce the work, or an object code interpreter used to run it.

The "Corresponding Source" for a work in object code form means all the source code needed to generate, install, and (for an executable work) run the object code and to modify the work, including scripts to control those activities. However, it does not include the work's System Libraries, or general-purpose tools or generally available free programs which are used unmodified in performing those activities but which are not part of the work. For example, Corresponding Source includes interface definition files associated with source files for the work, and the source code for shared libraries and dynamically linked subprograms that the work is specifically designed to require, such as by intimate data communication or control flow between those subprograms and other parts of the work.

The Corresponding Source need not include anything that users can regenerate automatically from other parts of the Corresponding Source.

The Corresponding Source for a work in source code form is that same work.

2. Basic Permissions.

All rights granted under this License are granted for the term of copyright on the Program, and are irrevocable provided the stated conditions are met. This License explicitly affirms your unlimited permission to run the unmodified Program. The output from running a covered work is covered by this License only if the output, given its content, constitutes a covered work. This License acknowledges your rights of fair use or other equivalent, as provided by copyright law.

You may make, run and propagate covered works that you do not convey, without conditions so long as your license otherwise remains in force. You may convey covered works to others for the sole purpose of having them make modifications exclusively for you, or provide you with facilities for running those works, provided that you comply with the terms of this License in conveying all material for which you do not control copyright. Those thus making or running the covered works for you must do so exclusively on your behalf, under your direction and control, on terms that prohibit them from making any copies of your copyrighted material outside their relationship with you.

Conveying under any other circumstances is permitted solely under the conditions stated below. Sublicensing is not allowed; section 10 makes it unnecessary.

3. Protecting Users' Legal Rights From Anti-Circumvention Law.

No covered work shall be deemed part of an effective technological measure under any applicable law fulfilling obligations under article 11 of the WIPO copyright treaty adopted on 20 December 1996, or similar laws prohibiting or restricting circumvention of such measures.

When you convey a covered work, you waive any legal power to forbid circumvention of technological measures to the extent such circumvention is effected by exercising rights under this License with respect to the covered work, and you disclaim any intention to limit operation or modification of the work as a means of enforcing, against the work's users, your or third parties' legal rights to forbid circumvention of technological measures.

4. Conveying Verbatim Copies.

You may convey verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice; keep intact all notices stating that this License and any non-permissive terms added in accord with section 7 apply to the code; keep intact all notices of the absence of any warranty; and give all recipients a copy of this License along with the Program.

You may charge any price or no price for each copy that you convey, and you may offer support or warranty protection for a fee.

5. Conveying Modified Source Versions.

You may convey a work based on the Program, or the modifications to produce it from the Program, in the form of source code under the terms of section 4, provided that you also meet all of these conditions:

- a) The work must carry prominent notices stating that you modified it, and giving a relevant date.
- b) The work must carry prominent notices stating that it is released under this License and any conditions added under section 7. This

requirement modifies the requirement in section 4 to "keep intact all notices".

- c) You must license the entire work, as a whole, under this License to anyone who comes into possession of a copy. This License will therefore apply, along with any applicable section 7 additional terms, to the whole of the work, and all its parts, regardless of how they are packaged. This License gives no permission to license the work in any other way, but it does not invalidate such permission if you have separately received it.
- d) If the work has interactive user interfaces, each must display Appropriate Legal Notices; however, if the Program has interactive interfaces that do not display Appropriate Legal Notices, your work need not make them do so.

A compilation of a covered work with other separate and independent works, which are not by their nature extensions of the covered work, and which are not combined with it such as to form a larger program, in or on a volume of a storage or distribution medium, is called an "aggregate" if the compilation and its resulting copyright are not used to limit the access or legal rights of the compilation's users beyond what the individual works permit. Inclusion of a covered work in an aggregate does not cause this License to apply to the other parts of the aggregate.

6. Conveying Non-Source Forms.

You may convey a covered work in object code form under the terms of sections 4 and 5, provided that you also convey the machine-readable Corresponding Source under the terms of this License, in one of these ways:

- a) Convey the object code in, or embodied in, a physical product (including a physical distribution medium), accompanied by the Corresponding Source fixed on a durable physical medium customarily used for software interchange.
- b) Convey the object code in, or embodied in, a physical product (including a physical distribution medium), accompanied by a written offer, valid for at least three years and valid for as long as you offer spare parts or customer support for that product model, to give anyone who possesses the object code either (1) a copy of the Corresponding Source for all the software in the product that is covered by this License, on a durable physical medium customarily used for software interchange, for a price no more than your reasonable cost of physically performing this conveying of source, or (2) access to copy the Corresponding Source from a network server at no charge.
- c) Convey individual copies of the object code with a copy of the written offer to provide the Corresponding Source. This alternative is allowed only occasionally and noncommercially, and only if you received the object code with such an offer, in accord with subsection 6b.
- d) Convey the object code by offering access from a designated place (gratis or for a charge), and offer equivalent access to the Corresponding Source in the same way through the same place at no further charge. You need not require recipients to copy the Corresponding Source along with the object code. If the place to copy the object code is a network server, the Corresponding Source may be on a different server (operated by you or a third party) that supports equivalent copying facilities, provided you maintain clear directions next to the object code saying where to find the Corresponding Source. Regardless of what server hosts the Corresponding Source, you remain obligated to ensure that it is available for as long as needed to satisfy these requirements.
- e) Convey the object code using peer-to-peer transmission, provided you inform other peers where the object code and Corresponding Source of the work are being offered to the general public at no charge under subsection 6d.

A separable portion of the object code, whose source code is excluded from the Corresponding Source as a System Library, need not be included in conveying the object code work.

A "User Product" is either (1) a "consumer product", which means any tangible personal property which is normally used for personal, family, or household purposes, or (2) anything designed or sold for incorporation into a dwelling. In determining whether a product is a consumer product, doubtful cases shall be resolved in favor of coverage. For a particular product received by a particular user, "normally used" refers to a typical or common use of that class of product, regardless of the status of the particular user or of the way in which the particular user actually uses, or expects or is expected to use, the product. A product is a consumer product regardless of whether the product has substantial commercial, industrial or non-consumer uses, unless such uses represent the only significant mode of use of the product.

"Installation Information" for a User Product means any methods, procedures, authorization keys, or other information required to install and execute modified versions of a covered work in that User Product from a modified version of its Corresponding Source. The information must suffice to ensure that the

continued functioning of the modified object code is in no case prevented or interfered with solely because modification has been made.

If you convey an object code work under this section in, or with, or specifically for use in, a User Product, and the conveying occurs as part of a transaction in which the right of possession and use of the User Product is transferred to the recipient in perpetuity or for a fixed term (regardless of how the transaction is characterized), the Corresponding Source conveyed under this section must be accompanied by the Installation Information. But this requirement does not apply if neither you nor any third party retains the ability to install modified object code on the User Product (for example, the work has been installed in ROM).

The requirement to provide Installation Information does not include a requirement to continue to provide support service, warranty, or updates for a work that has been modified or installed by the recipient, or for the User Product in which it has been modified or installed. Access to a network may be denied when the modification itself materially and adversely affects the operation of the network or violates the rules and protocols for communication across the network.

Corresponding Source conveyed, and Installation Information provided, in accord with this section must be in a format that is publicly documented (and with an implementation available to the public in source code form), and must require no special password or key for unpacking, reading or copying.

7. Additional Terms.

"Additional permissions" are terms that supplement the terms of this License by making exceptions from one or more of its conditions. Additional permissions that are applicable to the entire Program shall be treated as though they were included in this License, to the extent that they are valid under applicable law. If additional permissions apply only to part of the Program, that part may be used separately under those permissions, but the entire Program remains governed by this License without regard to the additional permissions.

When you convey a copy of a covered work, you may at your option remove any additional permissions from that copy, or from any part of it. (Additional permissions may be written to require their own removal in certain cases when you modify the work.) You may place additional permissions on material, added by you to a covered work, for which you have or can give appropriate copyright permission.

Notwithstanding any other provision of this License, for material you add to a covered work, you may (if authorized by the copyright holders of that material) supplement the terms of this License with terms:

- a) Disclaiming warranty or limiting liability differently from the terms of sections 15 and 16 of this License; or
- b) Requiring preservation of specified reasonable legal notices or author attributions in that material or in the Appropriate Legal Notices displayed by works containing it; or
- c) Prohibiting misrepresentation of the origin of that material, or requiring that modified versions of such material be marked in reasonable ways as different from the original version; or
- d) Limiting the use for publicity purposes of names of licensors or authors of the material; or
- e) Declining to grant rights under trademark law for use of some trade names, trademarks, or service marks; or
- f) Requiring indemnification of licensors and authors of that material by anyone who conveys the material (or modified versions of it) with contractual assumptions of liability to the recipient, for any liability that these contractual assumptions directly impose on those licensors and authors.

All other non-permissive additional terms are considered "further restrictions" within the meaning of section 10. If the Program as you received it, or any part of it, contains a notice stating that it is governed by this License along with a term that is a further restriction, you may remove that term. If a license document contains a further restriction but permits relicensing or conveying under this License, you may add to a covered work material governed by the terms of that license document, provided that the further restriction does not survive such relicensing or conveying.

If you add terms to a covered work in accord with this section, you must place, in the relevant source files, a statement of the additional terms that apply to those files, or a notice indicating where to find the applicable terms.

Additional terms, permissive or non-permissive, may be stated in the form of a separately written license, or stated as exceptions; the above requirements apply either way.

8. Termination.

You may not propagate or modify a covered work except as expressly provided under this License. Any attempt otherwise to propagate or modify it is void, and will automatically terminate your rights under this License (including any patent licenses granted under the third paragraph of section 11).

However, if you cease all violation of this License, then your license from a particular copyright holder is reinstated (a) provisionally, unless and until the copyright holder explicitly and finally terminates your license, and (b) permanently, if the copyright holder fails to notify you of the violation by some reasonable means prior to 60 days after the cessation.

Moreover, your license from a particular copyright holder is reinstated permanently if the copyright holder notifies you of the violation by some reasonable means, this is the first time you have received notice of violation of this License (for any work) from that copyright holder, and you cure the violation prior to 30 days after your receipt of the notice.

Termination of your rights under this section does not terminate the licenses of parties who have received copies or rights from you under this License. If your rights have been terminated and not permanently reinstated, you do not qualify to receive new licenses for the same material under section 10.

9. Acceptance Not Required for Having Copies.

You are not required to accept this License in order to receive or run a copy of the Program. Ancillary propagation of a covered work occurring solely as a consequence of using peer-to-peer transmission to receive a copy likewise does not require acceptance. However, nothing other than this License grants you permission to propagate or modify any covered work. These actions infringe copyright if you do not accept this License. Therefore, by modifying or propagating a covered work, you indicate your acceptance of this License to do so.

10. Automatic Licensing of Downstream Recipients.

Each time you convey a covered work, the recipient automatically receives a license from the original licensors, to run, modify and propagate that work, subject to this License. You are not responsible for enforcing compliance by third parties with this License.

An "entity transaction" is a transaction transferring control of an organization, or substantially all assets of one, or subdividing an organization, or merging organizations. If propagation of a covered work results from an entity transaction, each party to that transaction who receives a copy of the work also receives whatever licenses to the work the party's predecessor in interest had or could give under the previous paragraph, plus a right to possession of the Corresponding Source of the work from the predecessor in interest, if the predecessor has it or can get it with reasonable efforts.

You may not impose any further restrictions on the exercise of the rights granted or affirmed under this License. For example, you may not impose a license fee, royalty, or other charge for exercise of rights granted under this License, and you may not initiate litigation (including a cross-claim or counterclaim in a lawsuit) alleging that any patent claim is infringed by making, using, selling, offering for sale, or importing the Program or any portion of it.

11. Patents.

A "contributor" is a copyright holder who authorizes use under this License of the Program or a work on which the Program is based. The work thus licensed is called the contributor's "contributor version".

A contributor's "essential patent claims" are all patent claims owned or controlled by the contributor, whether already acquired or hereafter acquired, that would be infringed by some manner, permitted by this License, of making, using, or selling its contributor version, but do not include claims that would be infringed only as a consequence of further modification of the contributor version. For purposes of this definition, "control" includes the right to grant patent sublicenses in a manner consistent with the requirements of this License.

Each contributor grants you a non-exclusive, worldwide, royalty-free patent license under the contributor's essential patent claims, to make, use, sell, offer for sale, import and otherwise run, modify and propagate the contents of its contributor version.

In the following three paragraphs, a "patent license" is any express agreement or commitment, however denominated, not to enforce a patent (such as an express permission to practice a patent or covenant not to sue for patent infringement). To "grant" such a patent license to a party means to make such an agreement or commitment not to enforce a patent against the party.

If you convey a covered work, knowingly relying on a patent license, and the Corresponding Source of the work is not available for anyone to copy, free of charge and under the terms of this License, through a publicly available network server or other readily accessible means, then you must either (1) cause the Corresponding Source to be so available, or (2) arrange to deprive yourself of the benefit of the patent license for this particular work, or (3) arrange, in a manner consistent with the requirements of this License, to extend the patent license to downstream recipients. "Knowingly relying" means you have actual knowledge that, but for the patent license, your conveying the covered work in a country, or your recipient's use of the covered work in a country, would infringe one or more identifiable patents in that country that you have reason to believe are valid.

If, pursuant to or in connection with a single transaction or arrangement, you convey, or propagate by procuring conveyance of, a covered work, and grant a patent license to some of the parties receiving the covered work authorizing them to use, propagate, modify or convey a specific copy of the covered work, then the patent license you grant is automatically extended to all recipients of the covered work and works based on it.

A patent license is "discriminatory" if it does not include within the scope of its coverage, prohibits the exercise of, or is conditioned on the non-exercise of one or more of the rights that are specifically granted under this License. You may not convey a covered work if you are a party to an arrangement with a third party that is in the business of distributing software, under which you make payment to the third party based on the extent of your activity of conveying the work, and under which the third party grants, to any of the parties who would receive the covered work from you, a discriminatory patent license (a) in connection with copies of the covered work conveyed by you (or copies made from those copies), or (b) primarily for and in connection with specific products or compilations that contain the covered work, unless you entered into that arrangement, or that patent license was granted, prior to 28 March 2007.

Nothing in this License shall be construed as excluding or limiting any implied license or other defenses to infringement that may otherwise be available to you under applicable patent law.

12. No Surrender of Others' Freedom.

If conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot convey a covered work so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not convey it at all. For example, if you agree to terms that obligate you to collect a royalty for further conveying from those to whom you convey the Program, the only way you could satisfy both those terms and this License would be to refrain entirely from conveying the Program.

13. Use with the GNU Affero General Public License.

Notwithstanding any other provision of this License, you have permission to link or combine any covered work with a work licensed under version 3 of the GNU Affero General Public License into a single combined work, and to convey the resulting work. The terms of this License will continue to apply to the part which is the covered work, but the special requirements of the GNU Affero General Public License, section 13, concerning interaction through a network will apply to the combination as such.

14. Revised Versions of this License.

The Free Software Foundation may publish revised and/or new versions of the GNU General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies that a certain numbered version of the GNU General Public License "or any later version" applies to it, you have the option of following the terms and conditions either of that numbered version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of the GNU General Public License, you may choose any version ever published by the Free Software Foundation.

If the Program specifies that a proxy can decide which future versions of the GNU General Public License can be used, that proxy's public statement of acceptance of a version permanently authorizes you to choose that version for the Program.

Later license versions may give you additional or different permissions. However, no additional obligations are imposed on any author or copyright holder as a result of your choosing to follow a later version.

15. Disclaimer of Warranty.

THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

16. Limitation of Liability.

IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MODIFIES AND/OR CONVEYS THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

17. Interpretation of Sections 15 and 16.

If the disclaimer of warranty and limitation of liability provided above cannot be given local legal effect according to their terms, reviewing courts shall apply local law that most closely approximates an absolute waiver of all civil liability in connection with the Program, unless a warranty or assumption of liability accompanies a copy of the Program in return for a fee.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest possible use to the public, the best way to achieve this is to make it free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest to attach them to the start of each source file to most effectively state the exclusion of warranty, and each file should have at least the "copyright" line and a pointer to where the full notice is found.

<one line to give the program's name and a brief idea of what it does.>
Copyright (C) <year> <name of author>

This program is free software: you can redistribute it and/or modify it under the terms of the GNU General Public License as published by the Free Software Foundation, either version 3 of the License, or (at your option) any later version.

This program is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU General Public License for more details.

You should have received a copy of the GNU General Public License along with this program. If not, see <<http://www.gnu.org/licenses/>>.

Also add information on how to contact you by electronic and paper mail.

If the program does terminal interaction, make it output a short notice like this when it starts in an interactive mode:

```
<program> Copyright (C) <year> <name of author>  
This program comes with ABSOLUTELY NO WARRANTY; for details type  
'show w'.  
This is free software, and you are welcome to redistribute it  
under certain conditions; type 'show c' for details.
```

The hypothetical commands 'show w' and 'show c' should show the appropriate parts of the General Public License. Of course, your program's commands might be different; for a GUI interface, you would use an "about box".

You should also get your employer (if you work as a programmer) or school, if any, to sign a "copyright disclaimer" for the program, if necessary. For more information on this, and how to apply and follow the GNU GPL, see <<http://www.gnu.org/licenses/>>.

The GNU General Public License does not permit incorporating your program into proprietary programs. If your program is a subroutine library, you may consider it more useful to permit linking proprietary applications with the library. If this is what you want to do, use the GNU Lesser General Public License instead of this License. But first, please read <http://www.gnu.org/philosophy/why-not-lgpl.html>.

GNU LESSER GENERAL PUBLIC LICENSE

Version 2.1, February 1999

Copyright (C) 1991, 1999 Free Software Foundation, Inc.
51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA
Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

[This is the first released version of the Lesser GPL. It also counts as the successor of the GNU Library Public License, version 2, hence the version number 2.1.]

Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public Licenses are intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users.

This license, the Lesser General Public License, applies to some specially designated software packages--typically libraries--of the Free Software Foundation and other authors who decide to use it. You can use it too, but we suggest you first think carefully about whether this license or the ordinary General Public License is the better strategy to use in any particular case, based on the explanations below.

When we speak of free software, we are referring to freedom of use, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish); that you receive source code or can get it if you want it; that you can change the software and use pieces of it in new free programs; and that you are informed that you can do these things.

To protect your rights, we need to make restrictions that forbid distributors to deny you these rights or to ask you to surrender these rights. These restrictions translate to certain responsibilities for you if you distribute copies of the library or if you modify it.

For example, if you distribute copies of the library, whether gratis or for a fee, you must give the recipients all the rights that we gave you. You must make sure that they, too, receive or can get the source code. If you link other code with the library, you must provide complete object files to the recipients, so that they can relink them with the library after making changes to the library and recompiling it. And you must show them these terms so they know their rights.

We protect your rights with a two-step method: (1) we copyright the library, and (2) we offer you this license, which gives you legal permission to copy, distribute and/or modify the library.

To protect each distributor, we want to make it very clear that there is no warranty for the free library. Also, if the library is modified by someone else and passed on, the recipients should know that what they have is not the original version, so that the original author's reputation will not be affected by problems that might be introduced by others.

Finally, software patents pose a constant threat to the existence of any free program. We wish to make sure that a company cannot effectively restrict the users of a free program by obtaining a restrictive license from a patent holder. Therefore, we insist that any patent license obtained for a version of the library must be consistent with the full freedom of use specified in this license.

Most GNU software, including some libraries, is covered by the ordinary GNU General Public License. This license, the GNU Lesser General Public License, applies to certain designated libraries, and is quite different from the ordinary General Public License. We use this license for certain libraries in order to permit linking those libraries into non-free programs.

When a program is linked with a library, whether statically or using a shared library, the combination of the two is legally speaking a combined work, a derivative of the original library. The ordinary General Public License therefore permits such linking only if the entire combination fits its criteria of freedom. The Lesser General Public License permits more lax criteria for linking other code with the library.

We call this license the "Lesser" General Public License because it does Less to protect the user's freedom than the ordinary General Public License. It also provides other free software developers Less of an advantage over competing non-free programs. These disadvantages are the reason we use the ordinary General Public License for many libraries. However, the Lesser license provides advantages in certain special circumstances.

For example, on rare occasions, there may be a special need to encourage the widest possible use of a certain library, so that it becomes a de-facto standard. To achieve this, non-free programs must be allowed to use the library. A more frequent case is that a free library does the same job as widely used non-free libraries. In this case, there is little to gain by limiting the free library to free software only, so we use the Lesser General Public License.

In other cases, permission to use a particular library in non-free programs enables a greater number of people to use a large body of free software. For example, permission to use the GNU C Library in non-free programs enables many more people to use the whole GNU operating system, as well as its variant, the GNU/Linux operating system.

Although the Lesser General Public License is Less protective of the users' freedom, it does ensure that the user of a program that is linked with the Library has the freedom and the wherewithal to run that program using a modified version of the Library.

The precise terms and conditions for copying, distribution and modification follow. Pay close attention to the difference between a "work based on the library" and a "work that uses the library". The former contains code derived from the library, whereas the latter must be combined with the library in order to run.

TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License Agreement applies to any software library or other program which contains a notice placed by the copyright holder or other authorized party saying it may be distributed under the terms of this Lesser General Public License (also called "this License"). Each licensee is addressed as "you".

A "library" means a collection of software functions and/or data prepared so as to be conveniently linked with application programs (which use some of those functions and data) to form executables.

The "Library", below, refers to any such software library or work which has been distributed under these terms. A "work based on the Library" means either the Library or any derivative work under copyright law: that is to say, a work containing the Library or a portion of it, either verbatim or with modifications and/or translated straightforwardly into another language. (Hereinafter, translation is included without limitation in the term "modification".)

"Source code" for a work means the preferred form of the work for making modifications to it. For a library, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the library.

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running a program using the Library is not restricted, and output from such a program is covered only if its contents constitute a work based on the Library (independent of the use of the Library in a tool for writing it). Whether that is true depends on what the Library does and what the program that uses the Library does.

1. You may copy and distribute verbatim copies of the Library's complete source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and distribute a copy of this License along with the Library.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Library or any portion of it, thus forming a work based on the Library, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

- **a)** The modified work must itself be a software library.
- **b)** You must cause the files modified to carry prominent notices stating that you changed the files and the date of any change.
- **c)** You must cause the whole of the work to be licensed at no charge to all third parties under the terms of this License.

- **d)** If a facility in the modified Library refers to a function or a table of data to be supplied by an application program that uses the facility, other than as an argument passed when the facility is invoked, then you must make a good faith effort to ensure that, in the event an application does not supply such function or table, the facility still operates, and performs whatever part of its purpose remains meaningful.

(For example, a function in a library to compute square roots has a purpose that is entirely well-defined independent of the application. Therefore, Subsection 2d requires that any application-supplied function or table used by this function must be optional: if the application does not supply it, the square root function must still compute square roots.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Library, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Library, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Library.

In addition, mere aggregation of another work not based on the Library with the Library (or with a work based on the Library) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may opt to apply the terms of the ordinary GNU General Public License instead of this License to a given copy of the Library. To do this, you must alter all the notices that refer to this License, so that they refer to the ordinary GNU General Public License, version 2, instead of to this License. (If a newer version than version 2 of the ordinary GNU General Public License has appeared, then you can specify that version instead if you wish.) Do not make any other change in these notices.

Once this change is made in a given copy, it is irreversible for that copy, so the ordinary GNU General Public License applies to all subsequent copies and derivative works made from that copy.

This option is useful when you wish to copy part of the code of the Library into a program that is not a library.

4. You may copy and distribute the Library (or a portion or derivative of it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange.

If distribution of object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place satisfies the requirement to distribute the source code, even though third parties are not compelled to copy the source along with the object code.

5. A program that contains no derivative of any portion of the Library, but is designed to work with the Library by being compiled or linked with it, is called a "work that uses the Library". Such a work, in isolation, is not a derivative work of the Library, and therefore falls outside the scope of this License.

However, linking a "work that uses the Library" with the Library creates an executable that is a derivative of the Library (because it contains portions of the Library), rather than a "work that uses the library". The executable is therefore covered by this License. Section 6 states terms for distribution of such executables.

When a "work that uses the Library" uses material from a header file that is part of the Library, the object code for the work may be a derivative work of the Library even though the source code is not. Whether this is true is especially significant if the work can be linked without the Library, or if the work is itself a library. The threshold for this to be true is not precisely defined by law.

If such an object file uses only numerical parameters, data structure layouts and accessors, and small macros and small inline functions (ten lines or less in length), then the use of the object file is unrestricted, regardless of whether it is legally a derivative work. (Executables containing this object code plus portions of the Library will still fall under Section 6.)

Otherwise, if the work is a derivative of the Library, you may distribute the object code for the work under the terms of Section 6. Any executables containing that work also fall under Section 6, whether or not they are linked directly with the Library itself.

6. As an exception to the Sections above, you may also combine or link a "work that uses the Library" with the Library to produce a work containing portions of the Library, and distribute that work under terms of your choice, provided that the terms permit modification of the work for the customer's own use and reverse engineering for debugging such modifications.

You must give prominent notice with each copy of the work that the Library is used in it and that the Library and its use are covered by this License. You must supply a copy of this License. If the work during execution displays copyright notices, you must include the copyright notice for the Library among them, as well as a reference directing the user to the copy of this License. Also, you must do one of these things:

- **a)** Accompany the work with the complete corresponding machine-readable source code for the Library including whatever changes were used in the work (which must be distributed under Sections 1 and 2 above); and, if the work is an executable linked with the Library, with the complete machine-readable "work that uses the Library", as object code and/or source code, so that the user can modify the Library and then relink to produce a modified executable containing the modified Library. (It is understood that the user who changes the contents of definitions files in the Library will not necessarily be able to recompile the application to use the modified definitions.)
- **b)** Use a suitable shared library mechanism for linking with the Library. A suitable mechanism is one that {1} uses at run time a copy of the library already present on the user's computer system, rather than copying library functions into the executable, and {2} will operate properly with a modified version of the library, if the user installs one, as long as the modified version is interface-compatible with the version that the work was made with.
- **c)** Accompany the work with a written offer, valid for at least three years, to give the same user the materials specified in Subsection 6a, above, for a charge no more than the cost of performing this distribution.
- **d)** If distribution of the work is made by offering access to copy from a designated place, offer equivalent access to copy the above specified materials from the same place.
- **e)** Verify that the user has already received a copy of these materials or that you have already sent this user a copy.

For an executable, the required form of the "work that uses the Library" must include any data and utility programs needed for reproducing the executable from it. However, as a special exception, the materials to be distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

It may happen that this requirement contradicts the license restrictions of other proprietary libraries that do not normally accompany the operating system. Such a contradiction means you cannot use both them and the Library together in an executable that you distribute.

7. You may place library facilities that are a work based on the Library side-by-side in a single library together with other library facilities not covered by this License, and distribute such a combined library, provided that the separate distribution of the work based on the Library and of the other library facilities is otherwise permitted, and provided that you do these two things:

- **a)** Accompany the combined library with a copy of the same work based on the Library, uncombined with any other library facilities. This must be distributed under the terms of the Sections above.
- **b)** Give prominent notice with the combined library of the fact that part of it is a work based on the Library, and explaining where to find the accompanying uncombined form of the same work.

8. You may not copy, modify, sublicense, link with, or distribute the Library except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense, link with, or distribute the Library is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

9. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Library or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Library (or any work based on the Library), you indicate your acceptance of this License to do so, and

all its terms and conditions for copying, distributing or modifying the Library or works based on it.

10. Each time you redistribute the Library (or any work based on the Library), the recipient automatically receives a license from the original licensor to copy, distribute, link with or modify the Library subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties with this License.

11. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Library at all. For example, if a patent license would not permit royalty-free redistribution of the Library by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Library.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply, and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

12. If the distribution and/or use of the Library is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Library under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

13. The Free Software Foundation may publish revised and/or new versions of the Lesser General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Library specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Library does not specify a license version number, you may choose any version ever published by the Free Software Foundation.

14. If you wish to incorporate parts of the Library into other free programs whose distribution conditions are incompatible with these, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

NO WARRANTY

15. BECAUSE THE LIBRARY IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE LIBRARY, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE LIBRARY "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE LIBRARY IS WITH YOU. SHOULD THE LIBRARY PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

16. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE LIBRARY AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE LIBRARY (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE LIBRARY TO OPERATE WITH ANY

OTHER SOFTWARE), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Libraries

If you develop a new library, and you want it to be of the greatest possible use to the public, we recommend making it free software that everyone can redistribute and change. You can do so by permitting redistribution under these terms (or, alternatively, under the terms of the ordinary General Public License).

To apply these terms, attach the following notices to the library. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

one line to give the library's name and an idea of what it does.
Copyright (C) year name of author

This library is free software; you can redistribute it and/or modify it under the terms of the GNU Lesser General Public License as published by the Free Software Foundation; either version 2.1 of the License, or (at your option) any later version.

This library is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU Lesser General Public License for more details.

You should have received a copy of the GNU Lesser General Public License along with this library; if not, write to the Free Software Foundation, Inc., 51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA

Also add information on how to contact you by electronic and paper mail.

You should also get your employer (if you work as a programmer) or your school, if any, to sign a "copyright disclaimer" for the library, if necessary. Here is a sample; alter the names:

Yoyodyne, Inc., hereby disclaims all copyright interest in the library "Frob" [a library for tweaking knobs] written by James Random Hacker.

signature of Ty Coon, 1 April 1990
Ty Coon, President of Vice

That's all there is to it!

Apache License

Version 2.0, January 2004

TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

1. You must give any other recipients of the Work or Derivative Works a copy of this License; and
2. You must cause any modified files to carry prominent notices stating that You changed the files; and
3. You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and
4. If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License. You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and

distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions. Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

END OF TERMS AND CONDITIONS

APPENDIX: How to apply the Apache License to your work

To apply the Apache License to your work, attach the following boilerplate notice, with the fields enclosed by brackets "[]" replaced with your own identifying information. (Don't include the brackets!) The text should be enclosed in the appropriate comment syntax for the file format. We also recommend that a file or class name and description of purpose be included on the same "printed page" as the copyright notice for easier identification within third-party archives.

This product includes cryptographic software written by Eric Young (ey@cryptsoft.com). This product includes software written by Tim Hudson (tjh@cryptsoft.com).

Original SSLeay License

**Copyright (C) 1995-1998 Eric Young (ey@cryptsoft.com)
All rights reserved.**

This package is an SSL implementation written by Eric Young (ey@cryptsoft.com).
The implementation was written so as to conform with Netscape's SSL.

This library is free for commercial and non-commercial use as long as the following conditions are aheared to. The following conditions apply to all code found in this distribution, be it the RC4, RSA, lhash, DES, etc., code; not just the SSL code. The SSL documentation included with this distribution is covered by the same copyright terms except that the holder is Tim Hudson (tjh@cryptsoft.com).

Copyright remains Eric Young's, and as such any Copyright notices in the code are not to be removed.
If this package is used in a product, Eric Young should be given attribution as the author of the parts of the library used. This can be in the form of a textual message at program startup or in documentation (online or textual) provided with the package.

Redistribution and use in source and binary forms, with or without modification, are permitted provided that the following conditions are met:

1. Redistributions of source code must retain the copyright notice, this list of conditions and the following disclaimer.
2. Redistributions in binary form must reproduce the above copyright notice, this list of conditions and the following disclaimer in the documentation and/or other materials provided with the distribution.
3. All advertising materials mentioning features or use of this software must display the following acknowledgement:
"This product includes cryptographic software written by Eric Young (ey@cryptsoft.com)"
The word 'cryptographic' can be left out if the rouines from the library being used are not cryptographic related :-).
4. If you include any Windows specific code (or a derivative thereof) from the apps directory (application code) you must include an acknowledgement:
"This product includes software written by Tim Hudson (tjh@cryptsoft.com)"

THIS SOFTWARE IS PROVIDED BY ERIC YOUNG "AS IS" AND ANY EXPRESS OR IMPLIED WARRANTIES, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE ARE DISCLAIMED. IN NO EVENT SHALL THE AUTHOR OR CONTRIBUTORS BE LIABLE FOR ANY DIRECT, INDIRECT, INCIDENTAL, SPECIAL, EXEMPLARY, OR CONSEQUENTIAL DAMAGES (INCLUDING, BUT NOT LIMITED TO, PROCUREMENT OF SUBSTITUTE GOODS OR SERVICES; LOSS OF USE, DATA, OR PROFITS; OR BUSINESS INTERRUPTION) HOWEVER CAUSED AND ON ANY THEORY OF LIABILITY, WHETHER IN CONTRACT, STRICT LIABILITY, OR TORT (INCLUDING NEGLIGENCE OR OTHERWISE) ARISING IN ANY WAY OUT OF THE USE OF THIS SOFTWARE, EVEN IF ADVISED OF THE POSSIBILITY OF SUCH DAMAGE.

The licence and distribution terms for any publically available version or derivative of this code cannot be changed. i.e. this code cannot simply be copied and put under another distribution licence [including the GNU Public Licence.]

SIL OPEN FONT LICENSE

Version 1.1 - 26 February 2007

PREAMBLE

The goals of the Open Font License (OFL) are to stimulate worldwide development of collaborative font projects, to support the font creation efforts of academic and linguistic communities, and to provide a free and open framework in which fonts may be shared and improved in partnership with others.

The OFL allows the licensed fonts to be used, studied, modified and redistributed freely as long as they are not sold by themselves. The fonts, including any derivative works, can be bundled, embedded, redistributed and/or sold with any software provided that any reserved names are not used by derivative works. The fonts and derivatives, however, cannot be released under any other type of license. The requirement for fonts to remain under this license does not apply to any document created using the fonts or their derivatives.

DEFINITIONS

"Font Software" refers to the set of files released by the Copyright Holder(s) under this license and clearly marked as such. This may include source files, build scripts and documentation.

"Reserved Font Name" refers to any names specified as such after the copyright statement(s).

"Original Version" refers to the collection of Font Software components as distributed by the Copyright Holder(s).

"Modified Version" refers to any derivative made by adding to, deleting, or substituting — in part or in whole — any of the components of the Original Version, by changing formats or by porting the Font Software to a new environment.

"Author" refers to any designer, engineer, programmer, technical writer or other person who contributed to the Font Software.

PERMISSION & CONDITIONS

Permission is hereby granted, free of charge, to any person obtaining a copy of the Font Software, to use, study, copy, merge, embed, modify, redistribute, and sell modified and unmodified copies of the Font Software, subject to the following conditions:

- 1) Neither the Font Software nor any of its individual components, in Original or Modified Versions, may be sold by itself.
- 2) Original or Modified Versions of the Font Software may be bundled, redistributed and/or sold with any software, provided that each copy contains the above copyright notice and this license. These can be included either as stand-alone text files, human-readable headers or in the appropriate machine-readable metadata fields within text or binary files as long as those fields can be easily viewed by the user.
- 3) No Modified Version of the Font Software may use the Reserved Font Name(s) unless explicit written permission is granted by the corresponding Copyright Holder. This restriction only applies to the primary font name as presented to the users.
- 4) The name(s) of the Copyright Holder(s) or the Author(s) of the Font Software shall not be used to promote, endorse or advertise any Modified Version, except to acknowledge the contribution(s) of the Copyright Holder(s) and the Author(s) or with their explicit written permission.
- 5) The Font Software, modified or unmodified, in part or in whole, must be distributed entirely under this license, and must not be distributed under any other license. The requirement for fonts to remain under this license does not apply to any document created using the Font Software.

TERMINATION

This license becomes null and void if any of the above conditions are not met.

DISCLAIMER

THE FONT SOFTWARE IS PROVIDED "AS IS", WITHOUT WARRANTY OF ANY KIND, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO ANY WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE AND NONINFRINGEMENT OF COPYRIGHT, PATENT, TRADEMARK, OR OTHER RIGHT. IN NO EVENT SHALL THE COPYRIGHT HOLDER BE LIABLE FOR ANY CLAIM, DAMAGES OR OTHER LIABILITY, INCLUDING ANY GENERAL, SPECIAL, INDIRECT, INCIDENTAL, OR CONSEQUENTIAL DAMAGES, WHETHER IN AN ACTION OF CONTRACT, TORT OR OTHERWISE, ARISING FROM, OUT OF THE USE OR INABILITY TO USE THE FONT SOFTWARE OR FROM OTHER DEALINGS IN THE FONT SOFTWARE.
